SC Johnson Deb Stokolan® Light PURE - Skin Conditioning Cream - 1L

Variant code: 10-RES1L

SC Johnson Deb Stokolan Light PURE is a **skin conditioning cream for normal to dry skin** developed for professional environments where frequent hand washing, glove use and workplace exposure can contribute to moderate skin dryness. Manufactured by SC Johnson Professional, the Stokolan range is designed to support skin health across industrial, healthcare, food handling, office and commercial workplaces.

The formulation features a **non-greasy cream texture** that absorbs quickly without leaving an oily afterfeel, encouraging regular use throughout the working day. It contains **Shea Butter**, **Allantoin** and **Glycerin**, helping moisturise and condition the skin while supporting the skin's natural moisture balance. The cream is designed to leave hands feeling smooth and comfortable after use, making it suitable for daily application in high-frequency hygiene environments.

The product is **perfume-free and dye-free**, making it suitable for users who are sensitive to fragrances and colourants. It is dermatologist tested with **low allergenic potential** and carries **ECARF certification** for sensitive skin compatibility. Stokolan Light PURE is also suitable for use in food handling environments and has been independently evaluated to ensure trace residues are not expected to cause adverse toxicological effects when used correctly.

Designed for professional compatibility, the cream is suitable for use with **latex, vinyl and nitrile gloves**. Its **silicone-free formulation** also ensures compatibility in environments involving paint and surface coating processes, while independent testing confirms compatibility with rubber manufacturing and vulcanisation processes.

Product Features

- **Skin conditioning cream** for normal to dry skin
- **Non-greasy formulation** with quick absorption
- Contains **Shea Butter, Allantoin and Glycerin**

- **Perfume-free and dye-free** formulation
- **ECARF certified** and dermatologist tested
- Compatible with **latex, vinyl and nitrile gloves**

Product Benefits

- Helps maintain healthy skin condition in professional environments
- Supports skin hydration during frequent hand washing
- Encourages regular use with non-greasy skin feel
- Suitable for sensitive skin and fragrance-sensitive users
- Compatible with regulated food and healthcare environments
- Supports workplace compatibility where silicone-free products are required

Technical Characteristics

- Supplied in **1 litre cartridges**
- Designed for compatible SC Johnson Professional dispensers
- Suitable for daily use on normal to dry skin
- Silicone-free formulation
- Compatible with glove use and rubber production processes
- Store in a cool, dry environment and follow label instructions

Applications

SC Johnson Deb Stokolan Light PURE is suitable for industrial workplaces, food handling environments, healthcare facilities, offices and commercial settings where workers experience moderate skin dryness from daily activities. It is particularly effective in workplaces requiring frequent hand washing or prolonged glove use, helping maintain skin comfort and condition without affecting operational processes. Its perfume-free, dye-free and silicone-free formulation makes it suitable for sensitive environments where product compatibility and skin tolerance are important.
