Deodoscreen Urinal Screen - Original Floral Fragrance - Pack of 12

Variant code: 05-585

Deodoscreen Scented Urinal Screen is a practical washroom hygiene accessory designed to provide **long-lasting fragrance and debris protection** in commercial and public urinals. Featuring an **Original Floral Fragrance**, it helps mask unpleasant bathroom odours and maintain a fresher, more welcoming washroom environment. Suitable for use in **any urinal**, the screen combines fragrance delivery with a physical barrier that helps prevent debris from entering the drainage outlet.

Each screen provides **up to 30 days of fragrance**, making it suitable for routine washroom maintenance and monthly replacement schedules. Positioned inside the urinal, the screen helps catch unwanted debris before it reaches the waste outlet, **reducing the risk of drain blockages** and associated maintenance requirements. Its scented construction offers a straightforward way to improve the washroom experience without requiring a separate fragrance dispenser, batteries or electrical power.

Made from a **minimum of 75% recycled plastic**, the screen provides an environmentally conscious alternative to products manufactured entirely from virgin plastic. The screen itself is **100% recyclable**, while its accompanying **box and bag are also made from recycled material**. Because recycled plastic is used in its manufacture, individual screens may show slight colour variations or visible flecks. Supplied in a **pack of 12 Original Floral Fragrance urinal screens**, it offers a convenient solution for maintaining multiple urinals or organising regular replacement cycles.

Product Features

- **Original Floral Fragrance** helps maintain a pleasant washroom atmosphere
- **Up to 30 days of fragrance** per screen
- **Suitable for any urinal** for versatile washroom use
- **Deodorising fragrance** helps mask unpleasant bathroom odours
