Water Soluable Disolvo Laundry Bags - Box of 1000/30L - Red

Variant code: 18-DIS

Water Soluble Disolvo Laundry Bags are hygienic **30 litre infection control laundry bags** designed for the safe handling, transport and washing of contaminated linen in healthcare and commercial environments. Manufactured from fully water-soluble material, these red laundry bags help minimise direct contact with soiled textiles, supporting effective infection prevention and hygienic laundry management procedures.

Designed to dissolve completely during the washing cycle, these innovative laundry bags allow contaminated linen to be placed directly into the washing machine without the need for manual emptying. This significantly reduces the risk of cross-contamination and improves workplace hygiene standards. Their practical **30 litre capacity** makes them suitable for individual laundry loads, while the distinctive **red colour** supports easy identification and segregation of contaminated or designated laundry streams.

Supplied in a convenient **box of 1000 bags**, these water-soluble laundry sacks provide a cost-effective and efficient solution for high-volume infection control laundry operations in healthcare, hospitality and commercial laundering environments.

Product Features

- **Water soluble Disolvo laundry bags**
