# Dishwasher Salt Tablets - 25kg

**Variant code: 04-401**

**Dishwasher Salt Tablets** are **premium water softening salt tablets** designed for use in compatible dishwashers and water softening systems. Manufactured from high-grade salt and super-compacted into convenient tablets, they provide a reliable solution for maintaining effective water softener performance.

Designed to support the **regeneration of water softening systems**, the tablets help reduce the hardness of incoming water by replenishing the salt required for the softening process. This helps minimise limescale build-up in compatible equipment and supports efficient dishwasher operation, particularly in hard water areas.

Supplied in a convenient **25kg bag**, these premium salt tablets are suitable for professional kitchens, catering establishments and commercial premises. Their compacted construction provides a practical and reliable salt supply for regular water softener maintenance.

## Product Features

- **Premium high-grade salt tablets** for water softening
- Super-compacted construction for consistent tablet form
- Suitable for compatible dishwashers and water softeners
- Supports water softener regeneration
- Helps reduce limescale formation in hard water areas
- Recommended by leading equipment manufacturers
- Supplied in a **25kg bag**

## Product Benefits

- Supports reliable water softener performance
- Helps protect compatible equipment from limescale build-up
- Contributes to effective dishwasher operation
- Supports improved washing results in hard water areas
- Provides a convenient bulk supply for

Tel: 01626 355177
