Alavo Bactericidal Foaming Soap - Foaming Hand Soap Refill - Case of 4 x 3.5L

Variant code: 10-AL0467

Alavo Bactericidal Foaming Soap is a **professional foaming hand soap refill** designed to deliver effective hand cleansing and hygiene in commercial washrooms, healthcare facilities, educational environments and public buildings. Developed for use with the Alavo cartridge dispensing system, the soap combines reliable bactericidal performance with a pleasant user experience and economical operation.

The rich foaming formulation provides effective hand cleansing while helping maintain skin comfort during frequent use. Infused with a **pleasant perfumed fragrance**, the soap leaves hands feeling clean and refreshed after washing. The formula also contains **natural emollients** that help keep the skin soft and supple, making it suitable for environments where regular hand washing is encouraged.

Each 3.5L refill delivers approximately **10,000 doses**, helping reduce refill frequency and supporting efficient washroom management. The high-capacity cartridge design makes it particularly suitable for busy facilities where maintaining hygiene standards and minimising maintenance time are important operational priorities.

Supplied in a **case of 4 x 3.5L cartridges**, providing a total of 14 litres of product, Alavo Bactericidal Foaming Soap offers an economical and practical hand hygiene solution for high-traffic professional environments.
