Dosing Pump Restrictor Cap 5ml - Each

Variant code: 14-010

Dosing Pump Restrictor Cap - 5ml is a practical **pump dosage control accessory** designed to reduce the volume of liquid dispensed by compatible dosing pumps. The restrictor clip attaches directly to the pump mechanism, limiting its movement to reduce the amount delivered with each operation.

Each **5ml restrictor clip** reduces the pump's dispensing volume in 5ml stages. Multiple clips can be fitted together to achieve further reductions, providing flexibility when adjusting chemical dispensing quantities for different cleaning requirements.

Lightweight and easy to fit, this **dosing pump restrictor** helps support controlled product usage in professional cleaning environments. It is particularly useful for facilities managing **concentrated cleaning chemicals**, where consistent dispensing volumes are important for accurate dilution and economical product consumption.

Product Features

- **5ml dosage reduction** per restrictor clip.
- **Attaches directly to compatible dosing pumps**.
- **Multiple clips can be combined** for greater reduction.
- **Restricts pump movement** to control dispensing.
- **Lightweight design** for convenient handling.
- **Simple clip-on fitting** for pump adjustment.
- **Suitable for professional cleaning** applications.

Product Benefits

- **Improves dosage control** during chemical dispensing.
- **Helps minimise product waste** from excessive dispensing.
- **Supports consistent dosing** across repeated applications.
- **Flexible adjustment** using additional

restrictor clips.
- **Helps manage chemical consumption** and operating costs.
- **Easy installation** simplifies pump configuration.

Technical Characteristics

- **Product Type:** Dosing Pump Restrictor Clip
- **Primary Function:** Pump Dosage Reduction
- **Dosage Reduction:** 5ml Per Clip
- **Adjustment:** Multiple 5ml Stages
- **Installation:** Clip-On Pump Attachment
- **Compatibility:** Suitable Dosing Pumps
- **Individual Weight:** 1g
- **Operation:** Mechanical Pump Restriction
- **Power Requirement:** None
- **Application:** Controlled Liquid Dispensing
- **Unit of Sale:** Each

Applications

Ideal for **commercial cleaning, janitorial chemical dispensing and professional housekeeping** where controlled liquid dosing is required. Suitable for adjusting compatible pumps used with **cleaning concentrates and other approved liquid products**. Multiple clips can be fitted to reduce dispensing volume in 5ml increments. Always confirm pump compatibility and verify the resulting dosage before use.
