Dryft S-Motion Upright Scrubber Dryer

Variant code: 16-DRYFT

DRYFT S-Motion Upright Scrubber Dryer is a revolutionary hard floor cleaning machine engineered to clean areas traditional scrubber dryers simply cannot reach. Combining groundbreaking upright cleaning technology with an ultra-low profile design, the DRYFT S-Motion delivers 100% floor surface cleaning by effortlessly cleaning beneath partitions, around toilets, under sinks, deep into corners and along edges, helping facilities achieve superior cleaning standards in less time.

Designed with the world's lowest profile scrubber dryer head, DRYFT can clean beneath obstacles with as little as 5cm clearance. Its patented cleaning head shape provides exceptional manoeuvrability around toilets, washroom fixtures, partitions and other hard-to-reach areas that would normally require manual cleaning. Chamfered edges allow the machine to scrub and dry directly into corners, eliminating missed areas and reducing the need for secondary detailing work.

At the heart of the DRYFT system is its innovative 4200rpm scrubbing technology, delivering an effective cleaning width of up to 160cm while walking forward. This dramatically reduces cleaning time compared to conventional scrubber dryers, which often require multiple overlapping passes and significantly more operator movement to achieve the same coverage. The result is complete floor cleaning in up to half the time, improving productivity whilst maintaining exceptional cleaning performance.

Constructed with a forged aluminium torque-transmitting ball joint and advanced engineering throughout, the DRYFT S-Motion combines durability, agility and professional cleaning efficiency. Ideal for washrooms, healthcare facilities, hospitality venues, public buildings and commercial environments, it provides a smarter solution for achieving consistently cleaner, safer and drier floors.

Product Features

Tel: 01626 355177
Email: info@aukhygiene.com

- **Patented ultra-low profile scrubber dryer design**
- Cleans beneath partitions as low as 5cm clearance
- 4200rpm high-speed scrubbing technology
- Effective cleaning width up to 160cm while walking forward
- Patented head shape for hard-to-reach cleaning
- Chamfered cleaning head edges for corner cleaning
- Forged aluminium torque-transmitting ball joint
- Scrubs and dries floors in a single operation

Product Benefits

- Cleans up to 100% of accessible floor surfaces
- Reaches areas inaccessible to traditional scrubber dryers
- Reduces manual detailing around toilets, sinks and partitions
- Improves cleaning productivity and efficiency
- Delivers complete floor cleaning in up to half the time
- Leaves floors clean, dry and safe for immediate use
- Reduces labour requirements and operational costs

Technical Characteristics

- **4200rpm scrubbing technology**
- Ultra-low profile cleaning head
- Minimum cleaning clearance approximately 5cm
- Effective cleaning width up to 160cm
- Patented head geometry for close-access cleaning
- Forged aluminium ball joint assembly
- Corner and edge cleaning capability
- Professional upright scrubber dryer design

Applications

DRYFT S-Motion Upright Scrubber Dryer is ideal for washrooms, healthcare facilities, schools, airports, hospitality venues, leisure centres, commercial offices, retail environments and public buildings. Its unique low-profile design makes it

particularly effective in areas with partitions, cubicles, fixtures and tight spaces where conventional scrubber dryers cannot effectively clean.

Property	Value
Weight (kg)	7.3kg
Width (mm)	430
Height (mm)	1485
Voltage	25.2
Battery Run Time (Up to/Mins/Each)	Rough Floor: 60 mins, Smooth Floor: 75 mins
Noise Level (dB)	Smooth Floor: 70dB, Rough Floor: 75dB
Brush Speed (rpm)	High: 390, Low: 3500
Recovery Tank Capacity (L)	2.8
