A world's first, DRYFT comes with a patented ultra-low profile head shape designed to offer limited cleaning ability in hard to reach areas such as sinks and toilets. It's forged aluminium torque transmitting ball joint and chamfered edges allow for cleaning around corners without compromise.

DRYFT's ground breaking 4200rpm scrubbing technology cleans in widths of 160cm whilst you walk forwards. Other scrubber driers require you to walk 4x as much to cover the same area resulting in 100% floor cleaning in half the time.

**What is  motion™?**

S-Motion is the innovative cleaning technique exclusive to DRYFT. It enables users to clean floors more efficiently by **guiding DRYFT in an "S" shape from left to right**, covering a width of 160 cm with a single forward or backward walk.
