Eliminator Sanitising Fogger Aerosol - 200ml

Variant code: 06-865

Eliminator Sanitising Fogger Aerosol is a **high-performance room sanitising aerosol** designed to quickly disinfect enclosed spaces and hard surfaces. Supplied in a **200ml automatic fogging canister**, it produces a fine sanitising mist that treats areas of up to **100m³**, making it ideal for vehicles, classrooms, offices, healthcare environments and other shared spaces where rapid sanitisation is required.

Formulated with **over 90% alcohol**, the fogger provides powerful **bactericidal, fungicidal and viricidal** action. It has been independently tested to **BS EN 1276**, **BS EN 1650** and **BS EN 14476**, providing confidence in its effectiveness against bacteria, fungi and enveloped viruses. Once activated, the canister automatically disperses a fine mist throughout the room, sanitising the air while leaving an anti-bacterial layer on exposed surfaces and a fresh linen fragrance.

Simple to use, place the canister in the centre of the room, press the actuator until it locks, and allow the fogger to empty completely. Leave the area for **15 minutes**, then ventilate for a further **15 minutes** before re-entering. This quick and effective process helps improve hygiene standards while reducing the need for manual surface sanitising.

Ideal for routine infection control and hygiene maintenance, Eliminator Sanitising Fogger Aerosol provides an efficient solution for sanitising enclosed commercial, healthcare and public environments.

Product Features

- **200ml automatic room sanitising fogger aerosol**
- Covers areas up to **100m³**
- Contains **over 90% alcohol**
- Bactericidal, fungicidal and viricidal formulation
- Tested to **BS EN 1276**, **BS EN 1650** and **BS EN 14476**
- Leaves an anti-bacterial layer on treated surfaces
