

Envirowipe Compostable Cloths – Pack of 25 – Red

Variant code: 12-060R

Ecotech Envirowipe Compostable Cloths are **single-use compostable cleaning cloths** developed for professional environments where hygiene control and environmental responsibility are equally important. Manufactured under the Ecotech brand, which focuses on sustainable cleaning solutions, these cloths are designed to provide effective surface cleaning while supporting waste reduction initiatives.

Produced from compostable materials, Envirowipe cloths offer a practical alternative to traditional disposable wipes. They are suitable for a wide range of cleaning tasks and can be integrated into colour-coded hygiene systems, helping reduce the risk of cross-contamination in regulated environments. The **colour-coded format (blue, green, red and yellow)** supports compliance with established cleaning protocols across sectors such as healthcare, catering and facilities management.

These cloths deliver reliable cleaning performance while aligning with sustainability goals. Their disposable nature supports hygiene control in high-use areas, while the compostable composition helps reduce environmental impact compared to conventional synthetic wipes.

Product Features

- **Compostable disposable cleaning cloths** for professional use
- Manufactured as part of the Ecotech sustainable product range
- Suitable for general surface cleaning tasks
- **Colour-coded system (blue, green, red, yellow)** for hygiene control
- Designed for single-use applications
- Compatible with standard cleaning chemicals and disinfectants
- Supports environmentally conscious cleaning programmes

Product Benefits

- Helps reduce cross-contamination through colour-coded usage

- Supports sustainable waste management practices
- Provides convenient single-use hygiene control
- Reduces reliance on non-biodegradable cleaning materials
- Suitable for regulated environments with hygiene protocols
- Simplifies cleaning processes in high-traffic areas

Technical Characteristics

- Designed for single-use cleaning applications
- Compatible with a wide range of cleaning chemicals
- Dispose of in accordance with local composting or waste guidelines
- Store in a clean, dry environment prior to use
- Use appropriate PPE when handling cleaning chemicals
- Follow site-specific colour coding and hygiene procedures

Applications

Ecotech Envirowipe Compostable Cloths are suitable for use across commercial cleaning, healthcare, hospitality and food preparation environments where hygiene and sustainability are priorities. The colour-coded system allows for safe allocation to different cleaning zones, such as kitchens, washrooms and general surfaces, helping maintain compliance with cleaning standards. These cloths are particularly useful in high-traffic or regulated environments where disposable cleaning solutions are required to support infection control and efficient cleaning workflows.
