Windmill Purple Beerline Cleaner - Pipeline Cleaner & Sanitiser - 2 x 5L

Variant code: 04-227

Windmill Purple Beerline Cleaner is a pipeline cleaner and sanitiser designed to deliver **effective cleaning and hygiene maintenance** for beer dispensing systems. As part of the Windmill professional cleaning range, it ensures pipelines and dispensing equipment remain clean, fresh and free from contamination.

This formulation cleans and sweetens beer pumps and pipelines through a simple soaking process. It is suitable for use with both **pressurised dispensing systems and traditional hand pumps**, providing flexibility across different installations. The **purple indicating solution** offers a clear visual check, ensuring that the pipeline is fully cleaned and maintained to a high standard.

For use, dilute the solution at **1 part to 100 parts water** and draw it through the system until purple liquid appears at the tap. Allow the solution to remain in the line for approximately 5 minutes, during which it will change colour. Continue the process, drawing fresh solution through until the liquid remains purple, indicating the system is clean. Finally, flush thoroughly with clean water until no colour remains.

Supplied in a **2 x 5L format**, this product is ideal for professional environments requiring consistent and effective beerline cleaning.

Product Features

- Pipeline cleaner and sanitiser for **beer dispensing systems**
- **Purple indicator solution** confirms cleaning effectiveness
- Suitable for **pressurised systems and hand pumps**
- Cleans and freshens pipelines and pumps
- Designed for **simple soaking and circulation cleaning**
- Supplied in **twin pack for professional use**

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Ensures hygienic and clean beer dispensing systems
- Provides visual confirmation of cleaning process
- Helps maintain product quality and taste
- Suitable for a wide range of dispensing equipment
- Supports consistent and repeatable cleaning routines
- Ideal for high-use hospitality environments

Technical Characteristics

- Dilution ratio: **1:100 with water**
- Requires circulation through dispensing system
- Colour-changing indicator for cleaning verification
- Requires flushing with clean water after use
- Compatible with beer pumps and pipeline systems
- Use in accordance with manufacturer guidelines

Applications

Windmill Purple Beerline Cleaner is suitable for use in **pubs, bars, restaurants and hospitality venues** where beer dispensing systems are in operation. It is ideal for maintaining **clean pipelines, pumps and dispensing equipment**, ensuring hygiene and consistent beverage quality. Its visual indicator system makes it particularly useful for routine maintenance and compliance with cleaning standards.
