Evans E-Phos Perfumed Cleaner Sanitiser Descaler RTU - 6x1L

Variant code: 05-127

Evans E-Phos Perfumed Cleaner Sanitiser Descale is designed for effective cleaning of toilets, urinals, washbasins, showers and other acid-resistant washroom surfaces. Its **powerful acidic formulation** removes limescale, body fat and general soiling from porcelain, stainless steel, chrome, ceramic and quarry tiles, helping restore cleanliness and maintain a hygienic washroom environment. The **thickened, ready-to-use formula** clings to vertical surfaces and toilet bowls, providing extended contact time for effective cleaning and descaling.

Formulated with **phosphoric acid**, this multi-surface washroom cleaner provides **quick and efficient removal of mineral deposits, soap residues and everyday washroom dirt**. Its viscous consistency helps the cleaning solution remain in contact with surfaces, including toilet bowls, urinals and tiled areas, for improved cleaning performance. The product also offers **bactericidal cleaning properties**, with BS EN 1276 performance referenced in product guidance, although the applicable test conditions should be checked before making a specific disinfection claim. Regular use helps control limescale accumulation and maintain cleaner sanitary fittings.

Featuring a **long-lasting floral fragrance**, the cleaner leaves washrooms smelling fresh after cleaning and helps manage unpleasant odours associated with sanitary areas. Supplied in **1-litre angled-neck bottles** with a convenient finger grip and tamper-proof cap, it allows controlled application around toilet rims and other difficult-to-reach areas. The product is **ready to use for toilet, urinal and sanitary ware cleaning**, while dilution may be used for general surface cleaning according to the instructions. Supplied in a **pack of 6 x 1L bottles**, providing 6 litres in total, it is suitable for regular cleaning in commercial, institutional and public washrooms.

Product Features

- **Multi-surface toilet and washroom**

washroom hygiene when used according to validated instructions
- **Fresh floral fragrance** helps create a more pleasant washroom environment
- **Multi-surface compatibility** reduces the need for separate products across suitable washroom fittings
- **Ready-to-use formula** simplifies routine toilet and urinal cleaning
- **Angled-neck packaging** makes under-rim application more convenient
- **Effective cleaning action** supports efficient daily maintenance routines
- **Suitable for commercial washrooms** with frequent cleaning requirements
- **Pack of six bottles** provides a practical supply for cleaning teams and multiple facilities

Technical Characteristics

- **Product Range:** E-Phos
- **Product Type:** Perfumed Toilet and Washroom Cleaner and Descaler
- **Product Function:** Cleaning, Descaling and Washroom Deodorising
- **Cleaning Chemistry:** Acidic
- **Active Descaling Ingredient:** Phosphoric Acid
- **Physical Form:** Thickened Liquid
- **Appearance:** Clear Blue Viscous Liquid
- **Fragrance:** Floral
- **pH (Undiluted):** Approximately 1.3
- **Application Strength:** Ready to Use for Toilets, Urinals and Sanitary Ware
- **General Cleaning Dilution:** 1:50 with Hot Water
- **General Cleaning Dosage:** 100ml per 5L of Water
- **Toilet and Urinal Application:** Apply Undiluted
- **Toilet and Urinal Contact Time for Cleaning:** 2 Minutes
- **Sanitary Ware Application:** Apply Undiluted, Wipe and Rinse
- **Cleaning Method:** Brush, Wipe or Mop as Appropriate
- **Rinsing:** Rinse Sanitary Ware and Flush Toilets or Urinals After Cleaning
- **Soil Removal:** Limescale, Body Fat and General Soiling
- **Vertical Surface Cling:** Yes
- **Suitable Surface:** Porcelain
- **Suitable Surface:** Stainless Steel
- **Suitable Surface:** Chrome
- **Suitable Surface:** Ceramic Tiles

- **Suitable Surface:** Quarry Tiles
- **Suitable Fixtures:** Toilets, Urinals, Washbasins and Showers
- **Not Suitable For:** Vitreous Enamel or Fibreglass
- **Bactericidal Performance:** BS EN 1276 Referenced in Product Guidance; Confirm Validated Conditions Before Making Specific Efficacy Claims
- **Bottle Capacity:** 1L
- **Bottle Design:** Angled Neck with Finger Grip
- **Closure:** Tamper-Proof Cap
- **Shelf Life:** 3 Years
- **Pack Quantity:** 6 Bottles
- **Total Pack Volume:** 6L
- **Packaging Format:** 6 x 1L
- **Intended Use:** Professional Toilet and Washroom Cleaning
- **Safety:** Acidic Product; Follow Current Label and Safety Data Sheet Instructions

Applications

Ideal for **professional toilet cleaning, urinal descaling, washbasin maintenance, shower cleaning and general washroom hygiene** in offices, schools, colleges, universities, hospitals, care homes, hotels, restaurants, leisure centres, factories, shopping centres and public conveniences. Particularly suitable for **busy commercial washrooms requiring regular limescale removal and thorough cleaning**, the thickened formula clings to sanitary surfaces to help remove mineral deposits, body fat and everyday soiling. Its **long-lasting floral fragrance** leaves facilities smelling fresh, while the convenient angled-neck bottle supports efficient cleaning around toilet rims and other sanitary fittings.

Property	Value
Fragrance	Floral
