

Evans Glass Renovator and Machine Cleaner – 5L

Variant code: 04-493

Evans Glass Renovator is a professional **glass renovator and machine cleaner** developed by Evans Vanodine for restoring glassware and maintaining glasswashing machines. Designed for use in automatic glasswash systems, it effectively removes build-up that can affect the appearance and performance of glassware in busy hospitality environments.

This **low foam detergent** targets residues such as protein, yeast, beer deposits and bloom, helping to restore glassware to a clean and clear condition. In addition to improving glass clarity, it also works to **clean and sanitise both glassware and the machine**, supporting hygiene and operational efficiency. The **concentrated formulation** ensures economical use, making it suitable for regular maintenance routines in high-use settings.

Product Features

- **Glass renovator and machine cleaner** for professional use
- **Low foam formulation** for automatic glasswash systems
- Removes **protein, yeast, beer residue and bloom**
- Restores glassware clarity and appearance
- Cleans and **sanitises glassware and machines**
- **Concentrated formulation** for economical operation
- Designed for use in automated dosing systems

Product Benefits

- Improves presentation of glassware in hospitality environments
- Helps maintain consistent beverage quality and appearance
- Supports hygiene standards in glasswashing operations
- Extends the usable life of glassware by removing residue build-up
- Enhances efficiency of glasswashing machines
- Reduces need for replacement of cloudy

- or marked glasses
- Provides a cost-effective maintenance solution

Technical Characteristics

- Designed for use in **automatic glasswash machines only**
- **Not suitable for hand glasswashing**
- Use via automatic dosing system at recommended ratio
- Flush existing detergent from system before use
- Operate machine to circulate product through system
- Recommended for periodic use as part of maintenance routine
- Store in a cool, dry environment away from direct sunlight

Applications

Evans Glass Renovator is suitable for use in bars, pubs, restaurants and hospitality venues where glass presentation is critical. It is ideal for restoring clarity to glassware affected by residue build-up and for maintaining glasswashing machines in high-use environments. Regular use helps ensure consistent results and supports hygiene and operational standards in professional beverage service settings.
