

## Windmill Glass Wash – Glass Detergent for Enclosed Glass Washing Machines – 2 x 5L

Variant code: 04-492

**Windmill Glass Wash** is a high-performance detergent designed to deliver **effective cleaning and bright, streak-free results** in automatic glasswashing machines. Developed for professional environments, it ensures reliable cleaning performance across a wide range of conditions.

This **high active, low foaming formulation** effectively removes general soiling, residues and marks from drinking glasses, leaving them clean and clear. It is specially formulated to **maintain beer head retention**, ensuring glassware is suitable for use in bars and hospitality settings without affecting beverage quality.

Suitable for use in **all types of enclosed glasswashing machines**, the product performs consistently across different water conditions. Its controlled foam properties support efficient machine operation and consistent wash cycles.

Supplied in a **2 x 5L format**, it is ideal for high-volume environments requiring dependable and economical glasswashing performance.

---

### Product Features

- Detergent for **automatic glasswashing machines**
- **High active, low foaming formulation**
- Removes general soiling and residues
- Leaves glassware **clean and bright**
- Maintains **beer head retention**
- Suitable for all water conditions

---

### Product Benefits

- Ensures clear, professional presentation of glassware
- Maintains beverage quality in hospitality environments
- Supports efficient machine operation
- Provides consistent results across water conditions
- Ideal for high-use bar and catering settings

- Economical bulk format for professional use

---

## Technical Characteristics

- Suitable for **enclosed automatic glasswashing machines**
- Low foam formulation for machine compatibility
- Effective in **all water conditions**
- Designed for controlled dosing systems
- Compatible with standard glasswashing equipment
- Use in accordance with manufacturer guidelines

---

## Applications

Windmill Glass Wash is suitable for use in **bars, pubs, restaurants, hotels and hospitality venues**. It is ideal for cleaning **drinking glasses and barware** in automatic glasswashing machines, ensuring a clean, bright finish while maintaining performance standards required for beverage service.

Property	Value
Fragrance	Odourless
pH	13
Volume (L)	10
Area of Use	For use in enclosed glasswash machines only
CLP	corrosive
How to Use	Follow machine instructions; typically dilute 1:400, wash at =65°C. For soaking, dilute 1:10 for stain removal. Do not use by hand or in open-top brush machines. Avoid aluminium/galvanised metal. Product is highly caustic—wear protective gear.
Chemical Colour	Colourless
