

Evans Kettle Descaler – Limescale Remover Concentrate – Case of 4x1L

Variant code: 07-EZ10

Evans Kettle Descaler is a high-performance **limescale remover concentrate** developed by Evans Vanodine for maintaining equipment affected by scale build-up. This concentrated, acid-based formulation is designed to effectively remove **heavy limescale deposits**, helping to restore performance and efficiency in water-based equipment. Suitable for professional and domestic environments, it provides a practical solution for routine descaling maintenance.

Specifically formulated for use on **tea and coffee equipment and showerheads**, it is also safe for use on **stainless steel surfaces** when used as directed. The low dosage formulation makes it highly economical, with each litre capable of producing multiple cleaning solutions. Supplied in an easy-to-handle 1L bottle with an integrated **10ml dosing cap**, it allows for accurate and controlled application within cleaning routines.

Product Features

- **Concentrated limescale remover** for professional use
- **Acid-based formulation** for removing heavy scale build-up
- Suitable for tea and coffee equipment and showerheads
- Safe for use on **stainless steel** when used correctly
- **Low dosage formulation** for economical use
- 1L bottle with **integrated 10ml dosing cap**
- Designed for routine maintenance of scale-prone equipment

Product Benefits

- Helps restore efficiency of equipment affected by limescale
- Reduces build-up that can impact performance and longevity
- Provides cost-effective cleaning through concentrated formulation
- Supports consistent maintenance of

- water-based appliances
- Improves hygiene and cleanliness of treated equipment
- Allows precise dosing for controlled application
- Suitable for regular use in professional and domestic settings

Technical Characteristics

- Dilute according to manufacturer instructions before use
- Suitable for descaling kettles, coffee machines and showerheads
- Safe for stainless steel surfaces when used as directed
- Use the **10ml dosing cap** for accurate measurement
- Each litre produces multiple cleaning solutions depending on dilution
- Rinse thoroughly after application to remove residues
- Store in a cool, dry environment away from direct sunlight

Applications

The **Evans Kettle Descaler** is suitable for use in commercial kitchens, hospitality environments, offices and domestic settings where limescale build-up affects equipment performance. It is ideal for maintaining kettles, coffee machines and showerheads, ensuring efficient operation and prolonging equipment life. Its concentrated formulation and ease of use make it a practical solution for routine descaling and preventative maintenance.

Property	Value
Fragrance	Odourless
pH	0.15
Area of Use	Suitable for removing limescale from a variety of kitchen equipment.
Dosing Chart: 10L Dilution	recharge: 400ml
Dosing Chart: 5L Dilution	recharge: 200ml
CLP	corrosive, irritant
How to Use	Add 1 x 10 ml dose (using dosing cap on 1 L bottle) per 250 ml warm water into item to be descaled.
Chemical Colour	Colourless

Property	Value
Shower Heads	Dismantle showerhead, soak in solution for 5 mins, then rinse thoroughly. Soak in Evans Protect every 3 months to kill bacteria, including legionella. Use a stiff brush for heavy limescale. Descale regularly to maintain efficiency and extend lifespan.
Descaling Kettles, Urns and Other Equipment	Pour water into vessel and add the relevant dosage. Allow to soak for 5 minutes. Rinse thoroughly.
Dosing Chart: 500ml Dilution	recharge: 20ml
Dosing Chart: 250ml Dilution	recharge: 10ml
Coffee Machines	Pour water into reservoir and add relevant dosage. Switch on machine and draw 50% of the solution through then switch off and allow a 30 minute deactivation period. Empty reservoir then rinse thoroughly with clean water.
