Fimap MXR - Ride-On Scrubber Dryer

Variant code: 16-MXR

Fimap MXR is a compact and highly productive **ride-on scrubber dryer** designed to deliver exceptional cleaning efficiency while maintaining the manoeuvrability of a much smaller machine. Engineered to replace traditional walk-behind scrubber dryers, the MXR combines ride-on productivity with compact dimensions, allowing operators to clean larger areas faster whilst reducing overall labour costs.

Capable of cleaning up to **3,000m² per hour**, the MXR is ideal for facilities that require efficient floor maintenance across large corridors, halls and open spaces. Despite its impressive productivity, the machine remains compact enough to pass through standard doorways and fit into most passenger lifts, making it particularly suitable for multi-level buildings. The innovative steering design provides excellent manoeuvrability around obstacles and confined areas, enabling operators to complete cleaning tasks more quickly than with conventional walk-behind machines.

The MXR incorporates Fimap's intelligent **Eco ON/OFF System**, automatically stopping brush rotation and water flow whenever the machine is idle, helping reduce water, chemical and energy consumption. Daily maintenance is simplified through clearly identified yellow maintenance points, allowing operators to quickly identify components requiring attention without the need for tools. Supplied complete with batteries, charger and drive board, the MXR offers a complete ride-on floor cleaning solution designed to maximise productivity and minimise operational costs.

Product Features

- **Ride-on scrubber dryer** with compact machine dimensions
- Cleaning performance of up to **3,000m² per hour**
- Exceptional manoeuvrability for confined and busy environments
- **Eco ON/OFF System** automatically stops brush and water flow when idle
- Colour-coded maintenance points for simplified daily servicing

- Tool-free daily maintenance design
- Supplied with batteries, charger and drive board

Product Benefits

- Increases cleaning productivity by up to 43% compared to walk-behind machines
- Reduces operational costs by up to 36%
- Improves efficiency when cleaning large floor areas
- Provides excellent access through doorways, lifts and restricted spaces
- Reduces operator fatigue with comfortable ride-on operation
- Minimises water and chemical consumption through Eco mode functionality
- Simplifies maintenance and reduces daily servicing time

Technical Characteristics

- Professional **ride-on scrubber dryer**
- Cleaning productivity up to **3,000m²/h**
- Compact chassis suitable for standard doorways and lifts
- Advanced steering system for enhanced manoeuvrability
- Integrated Eco ON/OFF energy-saving technology
- Tool-free access for routine maintenance procedures
- Supplied complete with batteries, charger and drive board

Applications

Fimap MXR is ideal for schools, hospitals, healthcare facilities, shopping centres, leisure centres, public buildings, warehouses and commercial premises where large floor areas require efficient cleaning. Its compact dimensions make it particularly suitable for long corridors, large halls and multi-level facilities where traditional ride-on machines may be too large, while still delivering the productivity benefits and cost savings associated with ride-on floor cleaning equipment.

Property	Value
Length (mm)	1265

Property	Value
Warranty (Years)	1
Weight (kg)	190
Width (mm)	600
Height (mm)	1030
Accessories Included with Machine	Drive Board, Batteries, On-Board Charger, Dust Cover
Motor Wattage (W)	300
Voltage	24
Brush Width (mm)	560
Battery Charge Time (Minutes)	Overnight
Battery Run Time (Up to/Mins/Each)	Up to 250
Noise Level (dB)	63
Brush Speed (rpm)	140
Vacuum Width (mm)	705-800
Performance (m2 per Hour)	3000
Solution Tank Capacity (L)	67
Recovery Tank Capacity (L)	66
Brush Pressure (kg)	15
