Fimap Squeegee Blade Kit for MXR & iMX - Long Bar 800mm

Variant code: 16-221391

Fimap Squeegee Blade Kit is a **replacement front and rear squeegee blade set** designed for **Fimap iMX Battery Disc Scrubber Dryers** and **Fimap MXR Battery Disc Micro Ride-On Scrubber Dryers**. Available for both **600mm Short Bar** and **800mm Long Bar** squeegee assemblies, this complete kit includes both the **front and rear squeegee blades**, providing everything required to restore optimum water recovery performance.

Manufactured from durable, wear-resistant rubber, the blades create an effective seal against the floor surface, allowing the squeegee assembly to efficiently recover dirty water and leave floors clean, dry and safe after every cleaning pass. Replacing worn or damaged blades helps maintain maximum suction efficiency, reduces streaking and improves the overall performance of your scrubber dryer.

Designed as direct replacement components, the blades are quick and easy to install, minimising maintenance time and helping extend the service life of the squeegee assembly. Regular replacement also helps reduce residual water on floors, improving safety and maintaining professional cleaning standards.

Ideal for routine servicing and preventative maintenance, this replacement kit ensures reliable floor drying performance across a wide range of commercial cleaning environments.

Product Features

- Replacement front and rear squeegee blade kit
- Suitable for **Fimap iMX and MXR scrubber dryers**
- Available for:
  - **600mm Short Bar**
  - **800mm Long Bar**
- Includes both front and rear squeegee blades
- Durable, wear-resistant rubber construction
- Direct replacement components
- Easy to install
- Maintains efficient water recovery

performance

Product Benefits

- Restores optimum squeegee performance
- Leaves floors cleaner, drier and safer
- Reduces streaking and residual water
- Improves dirty water recovery efficiency
- Extends the service life of the squeegee assembly
- Quick replacement reduces machine downtime

Technical Characteristics

- **Product Type:** Squeegee Blade Kit
- **Bar Size Options:**
  - 600mm Short Bar
  - 800mm Long Bar
- **Kit Contents:**
  - Front Squeegee Blade
  - Rear Squeegee Blade
- **Material:** Heavy-Duty Wear-Resistant Rubber
- **Machine Compatibility:**
  - Fimap iMX Battery Disc Scrubber Dryer
  - Fimap MXR Battery Disc Micro Ride-On Scrubber Dryer
- **Installation:** Direct Replacement
- **Application:** Floor Water Recovery System

Applications

Fimap Squeegee Blade Kit is ideal for **commercial cleaning contractors, facilities management companies, warehouses, retail premises, healthcare facilities, schools, manufacturing sites and industrial environments** operating **Fimap iMX and MXR scrubber dryers**. Available for both **600mm Short Bar** and **800mm Long Bar** configurations, the kit helps maintain efficient dirty water recovery, ensuring hard floors are left clean, dry and safe while supporting reliable day-to-day cleaning performance.
