Finish Dishwasher Cleaner - 250ml

Variant code: 04-457

Finish Dishwasher Cleaner is a **specialist deep-cleaning liquid** designed to remove hidden grease, limescale and accumulated dirt from automatic dishwashers. Its powerful cleaning formulation reaches areas that regular dishwashing cycles may leave behind, including **filters, drains and internal pipes**, helping maintain a cleaner, fresher machine and support effective dishwashing performance.

Featuring **clog-dissolving technology**, the cleaner helps break down stubborn grease deposits and mineral scale that can accumulate inside vital dishwasher components. Regular cleaning helps reduce unpleasant odours caused by trapped food residues and greasy build-up, while the **fresh lemon fragrance** leaves the dishwasher smelling clean. By tackling hidden deposits, the formula supports routine appliance care and helps maintain consistent cleaning results.

Designed for convenient use during an **empty dishwasher cycle**, the ready-to-use liquid requires no manual measuring or dilution. Simply remove the sticker from the bottle cap without removing the cap, position the bottle upside down securely in the lower dishwasher rack and run a high-temperature programme according to the product label. Supplied in a **250ml bottle providing one complete cleaning application**, it offers a practical solution for regular dishwasher maintenance in domestic and workplace kitchens.

Product Features

- **Specialist dishwasher deep cleaner** for automatic dishwashers
- **Powerful grease removal** helps dissolve accumulated fatty deposits
- **Limescale removal** targets mineral build-up in internal components
- **Clog-dissolving technology** helps tackle deposits in filters, drains and pipes
- **Deep-cleaning action** reaches hidden areas of the dishwasher
- **Fresh lemon fragrance** helps leave the machine smelling clean
- **Odour-neutralising action** helps reduce unpleasant dishwasher smells
