Finish Rinse Aid - 400ml

Variant code: 04-456

Finish Rinse Aid is a **specialist dishwasher rinse aid** designed to deliver sparkling dishes, glasses and cutlery after every wash. Its **quick-drying formula** helps reduce water spots, streaks and cloudy residues, leaving dishwasher-safe tableware with a clean, shiny finish. Supplied in a convenient **400ml bottle**, it provides a practical addition to everyday automatic dishwashing routines.

Working during the dishwasher's **final rinse cycle**, the formula helps water drain more efficiently from washed items, reducing the droplets that can leave unsightly marks as they dry. It also helps prevent remaining **detergent and food residues** from redepositing onto dishes and glassware, improving the overall finish after washing. The result is **faster drying and enhanced shine**, particularly on glasses, crockery and cutlery.

Designed for **domestic and suitable professional dishwashing applications**, Finish Rinse Aid is easy to use with dishwashers equipped with a dedicated rinse aid dispenser. Simply fill the compartment according to the appliance manufacturer's instructions, and the dishwasher automatically releases the required amount during the rinse cycle. Ideal for homes, offices, staff kitchens and compatible catering dishwashers, it helps maintain consistent cleaning results and reduces the need for additional hand drying or polishing.

Product Features

- **Specialist dishwasher rinse aid** for automatic dishwashing machines
- **Quick-drying formula** helps dishes and cutlery dry faster
- Helps prevent **water spots, streaks and cloudy marks**
- Provides a **sparkling, shiny finish** on dishwasher-safe tableware
- Works during the dishwasher's **final rinse cycle**
