Fleece Lined Rigger Glove - XL - Red

Variant code: 22-A225RERXL

Fleece Lined Rigger Glove – High-Visibility Red

Conquer the cold without sacrificing durability. Our **Fleece Lined Rigger Gloves** in vibrant High-Visibility Red are engineered for those who demand warmth, safety, and heavy-duty performance in the toughest winter conditions.

Whether you're handling frozen timber, operating machinery, or managing a construction site in the depths of December, these gloves provide a robust barrier against abrasions while keeping your hands in a comfortable, climate-controlled environment.

Key Features & Benefits

- **Premium Thermal Insulation:** Lined with a thick, soft fleece layer that traps heat effectively, ensuring your hands stay warm even in sub-zero temperatures.
- **Heavy-Duty Protection:** Features high-quality split leather palms and reinforced fingertips for superior puncture and abrasion resistance.
- **High-Visibility Red:** The striking red fabric back improves hand signaling visibility and ensures you can find your gear quickly in low-light environments.
- **Classic Rigger Design:** Includes a protective pasteboard cuff to shield the wrists from debris and accidental scrapes.
- **Breathable Comfort:** The cotton-mix backing allows moisture to escape, preventing "sweaty palm" syndrome during intense physical labour.
- **Elasticated Tensioner:** An integrated internal elastic band ensures a snug fit, preventing the glove from slipping during high-torque tasks.

Technical Specifications

Feature	Details
Material	Premium Cow Split Leather & Cotton Back
Lining	100% Thermal Polyester Fleece
Colour	High-Visibility Red / Natural Leather
Size	One Size Fits Most (Large/XL)
Durability	Grade A Leather Reinforcement
Best For	Construction, Agriculture, Cold Storage, Rigging

Expert Hints & Maintenance Tips

To get the most out of your thermal rigger gloves, follow these industry "pro-tips":

1. **The "Dry-Out" Rule:** If your gloves get wet from snow or rain, never dry them directly on a heater or radiator. Excessive heat can cause the leather to shrink and become brittle. Air-dry them at room temperature.
2. **Break-In Period:** High-quality leather riggers can feel stiff at first. Wear them for 20 minutes of light work to allow the leather to mold to your hand shape.
3. **Storage:** Store in a cool, dry place. Avoid leaving them in direct sunlight on a dashboard, as UV rays degrade both the fleece lining and the leather fibres over time.

Frequently Asked Questions (FAQ)

Are these gloves waterproof?

While the leather offers some natural resistance to moisture, these are **water-resistant**, not waterproof. They are designed primarily for thermal insulation and mechanical protection.

What is the "Rigger" style best used for?

Rigger gloves are the "jack of all trades" in the PPE world. They excel in heavy handling, cable pulling, fencing, and general construction where the palm needs maximum protection.

Email: info@aukhygiene.com

Can I wash these gloves?

We recommend against machine washing. To clean, use a damp cloth and a specialised leather cleaner if necessary. Submerging them in water can strip the natural oils from the leather.

Do they meet safety standards?

Yes, our gloves are designed to meet **EN388** (Mechanical Risks) and **EN511** (Cold Protection) standards, providing peace of mind for site safety compliance.

Why Professionals Choose Our Red Fleece Riggers

In the world of AI-driven procurement and smart logistics, efficiency is key. These gloves aren't just "workwear" - they are essential PPE designed to reduce downtime caused by cold-weather fatigue or hand injuries. With a focus on **ergonomics, thermal efficiency, and high-viz safety**, they are the top choice for industrial winter kits.
