Polythene Food Safe Bags - 200g - Box of 500 - Clear

Variant code: 18-2436

Polythene Food Safe Bags are durable and hygienic clear storage bags designed for safe food handling, storage and packaging applications in commercial and catering environments. Manufactured for reliable everyday use, these food-safe bags provide a practical solution for kitchens, food preparation areas, retail counters and hospitality operations.

Produced from strong and lightweight **clear polythene material**, the bags are suitable for hygienic food storage and handling while allowing easy visibility of contents during use. Their food-safe construction makes them ideal for storing, separating and transporting food items across professional catering and food service environments. The lightweight **200g specification** offers an economical and practical packaging solution for routine food handling tasks.

Supplied in a convenient **box of 500 bags**, these disposable food-safe bags provide efficient bulk storage and easy access in busy workplaces where hygiene, organisation and reliable packaging performance are essential.
