Glove Clip - Black

Variant code: 22-A001BKR

Glove Clip (Black) – The Ultimate Heavy-Duty Glove Tether

Never lose your high-performance safety gear again. The **Glove Clip in Black** is a rugged, essential accessory designed for professionals who need their PPE accessible at a moment's notice. While many clips are flimsy, this model is built with **innovative reinforced polymer technology**, ensuring it stands up to the rigours of industrial sites, construction zones, and mechanical workshops.

Designed to complement advanced handwear - especially gloves featuring **water-repellent technology** and **liquid-roll-off coatings -** this clip ensures your gear stays off the floor and away from contaminants.

Key Features & Benefits

- **High-Tension Grip:** Engineered to hold everything from lightweight liners to heavy-duty **sandy palm finish** gloves without slipping.
- **Safety Breakaway Design:** Features a built-in safety breakaway point to prevent snagging hazards in high-risk machinery environments.
- **Extreme Durability:** Made from non-conductive and non-corrosive materials, making it perfect for electrical work or wet conditions.
- **Universal Attachment:** Easily clips to belt loops, D-rings, tool belts, or clothing, keeping your hands free and your workspace organised.
- **Sleek Professional Aesthetic:** The matte black finish resists scuffs and maintains a professional look even in the grimiest conditions.

Why Use a Glove Clip with Advanced PPE?

If you are using premium gloves that feature **twin-liner heat trapping** or specialised **oil-repellent surfaces**, you know they are an investment. A glove clip protects that investment by:

1. **Ensuring Breathability:** Hanging your gloves allows air to circulate through the **twin liner**, preventing moisture buildup and odours.
2. **Maintaining Coatings:** By keeping gloves off the ground, you prevent the **sandy palm grip** from picking up abrasive dirt or debris that can degrade the coating.
3. **Efficiency:** No more digging through pockets or toolboxes. Your gear is exactly where you need it, when you need it.

Technical Specifications

Feature	Detail
Material	High-Grade Engineering Polymer
Colour	Tactical Black
Weight	Lightweight (approx. 15g)
Compatibility	All standard Work/Safety Gloves
Safety Feature	Integrated Breakaway Connector

Pro-Tips & User Hints

- **The "Air-Out" Trick:** After a long shift, use the clip to hang your gloves in a well-ventilated area. This helps the **breathable twin liner** dry faster, extending the life of the glove.
- **Beyond Gloves:** This clip is incredibly versatile! It's also excellent for holding ear muffs, towels, or even light signal batons.
- **Attachment Hack:** If you don't have a belt loop, the high-tension jaw is strong enough to grip onto the waistband of heavy-duty work trousers or coveralls.

Frequently Asked Questions (FAQs)

Q: Will the clip damage my water-repellent gloves?A: Not at all. The interlocking teeth are designed to provide a firm grip without piercing or tearing the protective outer coating of your gloves.

Tel: 01626 355177
Email: info@aukhygiene.com

Q: Is the clip safe to use around electricity?A: Yes. The Glove Clip is made from non-conductive materials, reducing the risk of electrical conductivity compared to metal carabiners.

Q: How much weight can the clip hold?A: It is designed to hold the weight of standard industrial gloves (roughly 5kg of tension). The breakaway feature will trigger if the clip is caught in machinery to ensure the wearer's safety.

Maximise Your Workplace Safety

When it comes to **PPE organisation**, the Glove Clip is the missing link. By pairing this clip with your **liquid-repellent** and **impact-resistant** gear, you are creating a safer, more efficient workflow. It is the top-rated choice for **construction safety accessories** and **industrial gear management**.
