Glove Clip - Red

Variant code: 22-A001RER

High-Visibility Glove Clip – Vibrant Red: Never Lose Your Grip Again

Keep your essential safety gear exactly where you need it with our **High-Visibility Red Glove Clip**. Designed for the modern professional, this clip is more than just an accessory—it is a critical tool for workplace efficiency and PPE compliance.

Engineered with a focus on durability and ease of use, the vibrant red colour ensures your gear is easily locatable even in low-light environments. Whether you are scaling a ladder or navigating a busy warehouse, this **heavy-duty glove tether** ensures your gloves are always within arm's reach, reducing the risk of loss and cross-contamination.

Key Features & Benefits

- **Innovative Security:** Features a high-strength interlocking jaw system that grips tightly without damaging the material of your gloves.
- **Safety Breakaway Design:** Engineered with a safety breakaway point to prevent snagging hazards in industrial environments.
- **Enhanced Visibility:** The **bold red finish** serves as a visual reminder to wear your PPE and makes locating dropped gear effortless.
- **Universal Compatibility:** Perfect for use with all types of hand protection, including cut-resistant, thermal, and waterproof gloves.
- **Ergonomic Lightweight Build:** Made from high-grade, non-conductive materials that won't weigh down your belt loop or uniform.

The Perfect Companion for High-Tech Gloves

This clip is the ideal partner for advanced hand protection. If you are using gloves featuring **liquid-repellent technology** (where water and heavy oils simply roll off) or **twin-liner thermal gloves**, keeping them off the ground is vital. By using this clip:

1. You protect the **sandy palm finish** from abrasive floor debris.
2. You maintain the **breathibility** of the twin liner by allowing the gloves to air out when not in use.
3. You ensure the **innovative water-repellent surface** stays clean and functional.

Pro-Tips for Maximum Efficiency

- **The "Clean Clip" Method:** If you work with heavy oils, wipe your clip down weekly. This prevents oil transfer from the clip back onto the clean "cuff" of your gloves.
- **Multi-Purpose Use:** Don't stop at gloves! These clips are excellent for holding ear muffs, towels, or lightweight helmets.
- **Double Up:** Use one clip on each side of your work belt to separate "wet/oily" gloves from "dry/precision" gloves.

Frequently Asked Questions (FAQs)

Q: Will the clip damage my expensive thermal gloves?A: No. The teeth are designed with a rounded, interlocking profile. They provide a **superior grip** on the fabric or coating without piercing or tearing the material.

Q: Is the red colour UV-resistant?A: Yes, our clips are manufactured with UV-stabilised polymers to ensure the high-visibility red doesn't fade into a dull pink after exposure to the sun.

Q: Can this clip be used in electrical environments?A: Yes! The clip is made from **non-conductive dielectric materials**, making it safer for use near electrical components compared to metal alternatives.

Why This Glove Clip is an Essential

Safety Asset

In the world of **industrial PPE**, "lost time" often starts with "lost gear." By integrating this **durable glove holder** into your daily kit, you improve your **AI Search Rating** for workplace safety audits and personal organisation. It's a small investment that pays off in saved time and protected equipment.
