GrillStone

Variant code: 12-L402

GrillStone is a heavy-duty pumice cleaning stone designed to remove stubborn grease, carbon build-up and burnt-on food residue from commercial grills, griddles and cooking surfaces. Manufactured from high-quality natural pumice stone, this professional grill cleaning block provides powerful abrasive cleaning performance without the use of harsh chemicals or wire bristles.

Engineered for professional kitchens, catering businesses and contract cleaning environments, the GrillStone delivers fast and effective cleaning while remaining safer than traditional wire grill brushes. Its durable porous structure conforms to grill surfaces and cooking equipment, allowing deep cleaning of grates, flat-top griddles and broiler racks without damaging the metal surface. The stone gradually wears down during use, exposing fresh cleaning material for long-lasting performance and reliable results.

The natural pumice construction provides a non-toxic and food-safe cleaning solution that helps maintain hygienic cooking surfaces while improving food quality by removing carbonised residue and grease build-up. Suitable for use on warm or slightly cooled cooking surfaces, the GrillStone is ideal for commercial kitchens, food trucks, catering operations and domestic BBQ cleaning applications.

Product Features

- **Professional Jantex GrillStone cleaning block**
- Manufactured from natural pumice stone
- Heavy-duty grill and griddle cleaning performance
- Removes grease, carbon and burnt-on food residue
- Bristle-free safer alternative to wire brushes
- Non-toxic and food-safe cleaning solution
- Long-lasting durable abrasive structure
- **Suitable for commercial and domestic use**

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Effortlessly removes stubborn grease and carbon build-up
- Helps maintain hygienic cooking surfaces
- Safer alternative to wire brushes with no loose bristles
- Improves cooking surface cleanliness and food quality
- Reduces reliance on harsh cleaning chemicals
- Durable stone construction provides multiple cleaning uses
- Supports professional kitchen hygiene standards

Technical Characteristics

- **Natural pumice abrasive cleaning block**
- Porous wear-down cleaning structure
- Food-safe and non-toxic material
- Suitable for warm grill and griddle cleaning
- Compatible with grillstone handle systems (sold separately)
- Professional catering and janitorial suitable
- Chemical-free grill cleaning performance
- **Supplied individually**

Applications

GrillStone is ideal for commercial kitchens, restaurants, catering businesses, food trucks, hospitality venues, BBQ cleaning and contract cleaning services requiring powerful and hygienic grill cleaning performance. It is particularly suitable for flat-top griddles, grill grates, broiler racks, barbecue grills and cooking equipment with heavy carbon and grease build-up.
