Grip Glove - Latex - L - Green

Variant code: 22-A100GNRL

Grip Glove – Latex – Green: The Ultimate All-Rounder for Secure Handling

When the job demands a steady hand and unbeatable traction, the **Green Latex Grip Glove** is the industry standard. This premium-quality work glove is specifically engineered for those who need a reliable, **heavy-duty grip** without sacrificing breathability.

Whether you are working in construction, landscaping, or waste management, the 10-gauge seamless liner combined with a high-grade **latex palm dip** provides the perfect balance of "tough-as-nails" durability and all-day comfort.

Key Features & Benefits

- **Superior Crinkle Latex Grip:** The palm-dipped coating features a textured "crinkle" finish, providing **maximum traction** in both wet and dry environments.
- **10-Gauge Toughness:** Constructed with a heavy-duty 10-gauge knitted liner, offering excellent **tear and abrasion resistance** for handling rough materials like bricks, timber, and concrete.
- **Breathable Open-Back Design:** The uncoated back of the glove allows for **optimum ventilation**, keeping your hands cool and reducing sweat buildup during intense physical labour.
- **Ergonomic Comfort:** Anatomically shaped to mimic the natural curvature of the human hand, significantly **reducing hand fatigue** during long shifts.
- **Elasticated Knit Wrist:** Provides a secure, "stay-put" fit while acting as a barrier against dust and debris.

Feature	Detail
Material	Polyester/Cotton Knit Liner
Coating	Premium Natural Latex
Gauge	10-Gauge for heavy-duty durability
Colour	High-Visibility Green / Grey
Performance	High Tear & Abrasion Resistance

Pro-Tips for the Best User Experience

- **Wet Weather Handling:** Latex is naturally water-resistant. If you're working in the rain, these gloves will maintain their "sticky" grip on smooth surfaces like glass or plastic piping.
- **Break-In Period:** Like a good pair of boots, these gloves might feel slightly stiff out of the packet. Give them a few flexes of the hand to soften the 10-gauge knit for a custom-molded feel.
- **Avoid Petroleum:** While latex is incredibly tough against abrasion, it can degrade if exposed to oils or petrol. For oily environments, we recommend switching to a Nitrile-coated glove.

Frequently Asked Questions (FAQs)

Q: Are these gloves suitable for gardening and landscaping?
A: Absolutely! They are a favourite for gardeners because the thick latex coating protects against thorns and sharp branches, while the green colour blends perfectly with outdoor workwear.

Q: Can I wash these gloves?
A: Yes, they are machine washable in cold water. We recommend air-drying them to maintain the elasticity of the latex coating. Avoid high-heat dryers.

Q: Do these gloves contain natural rubber latex?
A: Yes, these gloves feature a natural latex coating. If you have a known latex allergy, we suggest browsing our **Nitrile or PU-coated** alternatives.
