38" High Reach Vacuum Kit - 21' Reach inc 38mm Adaptor

Variant code: 16-HLVK

38mm High Reach Vacuum Cleaning Kit is a professional high-level vacuum cleaning system designed to safely remove dust and debris from elevated surfaces while keeping operators firmly on the ground. Providing an impressive **working reach of approximately 21 feet**, this comprehensive kit enables efficient cleaning of ceilings, ducting, pipework, lighting, beams, ledges and ventilation systems without the need for ladders in many applications. Designed for compatibility with **38mm vacuum systems**, it works with most Numatic commercial vacuum cleaners using a 32/38mm hose connection.

The kit combines lightweight aluminium extension wands with a locking extension wand for added stability when working at height. Three angled extension wands (45°, 90° and 130°) allow precise positioning of cleaning tools around obstacles, ceiling lines and overhead fixtures. A wide selection of specialist vacuum accessories—including hard floor tools, Sidewinder dusting brushes, crevice tools and pipe tools—provides outstanding versatility across a broad range of cleaning tasks. The supplied **2.5m vacuum hose**, swivel cuff and 38mm screw-on adaptor ensure smooth airflow and unrestricted hose movement during operation.

Designed for commercial cleaning professionals, the AUK Hygiene High Reach Vacuum Kit improves safety, productivity and dust control in facilities where regular high-level cleaning is essential. Its durable construction, modular design and broad compatibility make it an invaluable solution for facilities management, contract cleaning and building maintenance teams.

Product Features

- Provides approximately 21ft (6.4m) working reach for high-level cleaning
- Compatible with 38mm vacuum systems and most Numatic commercial vacuum cleaners
- Includes lightweight aluminium extension wands and locking extension wand
- 45°, 90° and 130° extension wands for improved overhead access

- Supplied with a comprehensive range of specialist vacuum tools
- 2.5m vacuum hose with swivel cuff and 38mm screw-on hose adaptor included
- Interchangeable accessories for multiple cleaning applications
- Complete kit supplied ready for professional high-reach cleaning

Product Benefits

- **Enables safe cleaning of elevated surfaces from floor level**
- **Reduces reliance on ladders for many high-level cleaning tasks**
- **Improves access to ceilings, ducting, pipework, beams and ventilation systems**
- Lightweight aluminium poles reduce operator fatigue
- Interchangeable tools provide excellent cleaning versatility
- Swivel hose connection improves manoeuvrability and reduces hose twisting
- Compatible with widely used commercial vacuum systems
- Helps maintain cleaner, healthier commercial environments through effective dust removal

Technical Characteristics

- Product Type: High Reach Vacuum Cleaning Kit
- Working Reach: Approximately 21ft (6.4m)
- Vacuum System Compatibility: 38mm
- Compatible Machines: Most Numatic Commercial Vacuum Cleaners with 32/38mm Hose Connection
- Extension Wands: 3 × Aluminium Wands, 1 × Locking Extension Wand
- Angled Wands: 45°, 90° and 130°
- Vacuum Hose: 2.5m x 38mm
