

Rentokil Insectrol Blue Aerosol – 300ml

Variant code: 06-PS136

An insect killer spray which will help you to get rid of insects. This insecticidal spray kills fleas, ants, cockroaches, earwigs, bedbugs and most other crawling insects within the home. Contains Permethrin and D-Allethrin.

For fleas and bedbugs, spray infested areas lightly; all bed linen should be laundered not sprayed. Ideally, spray around carpets, skirting boards, bed heads and any other area where activity has been seen. For other insects, this spray has excellent residual activity, so is best sprayed into cracks and crevices where insect activity has been seen to give long-lasting insecticidal protection. It can also be used as a general spray against ants and crawling insects for rapid knockdown and kill.

Property	Value
Usage Instructions	This product is intended for indoor use. Always apply in well ventilated areas,
Do's & Don'ts	avoid heavy spraying on foam-backed carpets, plastics, synthetic tiles and polished surfaces. Exclude animals during application.
