Kärcher FR30 Pressure Washer Surface Cleaner Attachment

Variant code: 16-26429970

Kärcher FR30 Surface Cleaner is a **professional pressure washer surface cleaner attachment** designed to deliver fast, consistent and splash-free cleaning across large hard surface areas. Engineered for use with compatible Kärcher professional pressure washers, the FR30 significantly increases cleaning productivity, making it ideal for contractors, facilities managers and commercial cleaning professionals.

Featuring a high-speed rotating nozzle bar housed within a durable protective casing, the FR30 provides **up to 10 times greater area coverage compared to a conventional high-pressure jet**. This enables operators to clean larger surfaces more efficiently while achieving an even, streak-free finish. The enclosed cleaning head also helps minimise overspray, improving user comfort and reducing surrounding contamination.

The lightweight **plastic housing** offers excellent manoeuvrability, while the **double ceramic bearing system** ensures long service life and reliable operation under demanding conditions. A **flexible connection joint** improves ergonomics and handling, reducing operator fatigue during extended cleaning tasks. The integrated parking position allows convenient storage and protects the attachment when not in use.

Suitable for a wide range of exterior hard surfaces, the FR30 is an excellent solution for cleaning patios, pavements, forecourts, warehouse floors, driveways and public walkways. Please note that the **machine-specific nozzle kit must be ordered separately** to match the pressure washer being used.

Product Features

- **Professional pressure washer surface cleaner attachment**
- Provides **up to 10x greater area coverage** than standard pressure washing
- Lightweight **plastic housing** for improved manoeuvrability
- **Double ceramic bearing system** for

extended service life
- Flexible connection joint for ergonomic handling
- Integrated parking position for convenient storage

Product Benefits

- **Cleans large surface areas significantly faster**
- **Delivers a more consistent and uniform cleaning result**
- **Reduces operator fatigue through ergonomic design**
- Minimises overspray and splash during cleaning
- Increases productivity for professional cleaning tasks
- Suitable for demanding commercial and industrial applications

Technical Characteristics

- Model: **Kärcher FR30**
- Surface cleaner attachment for pressure washers
- Durable plastic casing
- Double ceramic bearing assembly
- Flexible swivel connection
- Integrated parking position
- **Machine-specific nozzle kit required (sold separately)**

Applications

Kärcher FR30 Surface Cleaner is ideal for **commercial cleaning contractors, facilities management companies, local authorities, property maintenance teams and industrial cleaning professionals**. It is suitable for cleaning **patios, paving, forecourts, driveways, warehouse floors, pedestrian areas, public spaces, decking and other hard exterior surfaces**, providing faster and more efficient cleaning compared to conventional pressure washing methods.

Property	Value
Weight (kg)	2.3 (including packaging)
Material	Plastic
Area of Use	Hard surfaces, floors, patios, and other pressure-washable surfaces.
