Kärcher FRV 30 Hard Surface Cleaner with Automatic Waste Water Pick-Up & 5m Suction Hose

Variant code: 16-21110100

Kärcher FRV 30 is a **professional hard surface cleaner with integrated waste water recovery**, designed to deliver efficient, splash-free cleaning of outdoor and indoor hard surfaces. Unlike conventional surface cleaners, the FRV 30 features an **automatic suction system** that removes dirty water as cleaning takes place, eliminating the need for additional rinsing and leaving surfaces cleaner and safer immediately after use.

Supplied with a **5m suction hose**, the FRV 30 directs recovered wastewater to a drain or suitable disposal point, making it ideal for environments where water containment and cleanliness are essential. This integrated recovery system helps improve productivity while reducing clean-up time and water residue on surfaces.

The unit is equipped with **three durable wheels** that provide excellent manoeuvrability across large surface areas, while the ergonomic handle allows comfortable operation on both floors and vertical surfaces such as walls. For wall cleaning applications, a separate nozzle pack is required.

Product Features

- **Professional hard surface cleaner with integrated waste water recovery**
- Automatic suction and dirty water removal system
- Supplied with **5m suction hose**
- No rinsing required after cleaning
- Directs wastewater to a drain or disposal point
- **Three-wheel design** for excellent manoeuvrability
- Ergonomic handle for comfortable operation
- Suitable for floor and wall cleaning
- Separate nozzle pack required for wall cleaning

Product Benefits

- **Removes dirty water during cleaning**

- **Leaves surfaces cleaner and safer immediately after use**
- **Reduces cleaning and rinsing time**
- Improves productivity on large cleaning jobs
- Excellent manoeuvrability and operator comfort
- Ideal for environments where wastewater control is required

Technical Characteristics

- Model: **Kärcher FRV 30**
- Product Type: **Hard Surface Cleaner with Waste Water Recovery**
- Recovery System: Integrated automatic suction
- Suction Hose Length: **5m**
- Mobility: Three-wheel design
- Application: Horizontal and vertical surface cleaning
- Wall Cleaning: Requires separate nozzle pack
- Compatibility: Suitable for compatible Kärcher pressure washers

Applications

Kärcher FRV 30 is ideal for **facilities management, contract cleaning, local authorities, industrial sites, commercial premises, car parks, warehouses, forecourts and public spaces**. Suitable for cleaning **concrete, paving, stone, hard floors, walkways, walls and exterior surfaces**, it provides efficient pressure washing with integrated wastewater recovery for cleaner, safer and more controlled cleaning operations.

Property	Value
Weight (kg)	5.6
Area of Use	Concrete Floors, Hard Floors, Workshops, Garages, Hospitality Areas, Commercial Premises, Indoor Cleaning, Outdoor Cleaning, Contract Cleaning.
How to Use	Connect to a compatible pressure washer, install the correct nozzle kit, attach the suction hose, and guide the FRV 30 across the surface while it cleans and simultaneously recovers dirty water.
Working Width (mm)	300
Maximum Pressure	250 bar
Connection Type	EASY!Lock
