Karcher KM 70/30 C BP 2SB - Battery Powered Sweeper

Variant code: 16-15172310

Karcher KM 70/30 C BP 2SB is a professional **battery powered walk-behind sweeper** designed to deliver fast, efficient and virtually dust-free sweeping across indoor and outdoor environments. Combining the convenience of cordless operation with the productivity of a powered sweeping system, this compact machine offers outstanding cleaning performance for commercial, industrial and public facilities.

Powered by a reliable battery system, the KM 70/30 C Bp 2SB significantly reduces operator effort compared to manual sweeping while delivering consistently high cleaning standards. Equipped with **two side brushes** and a powerful main roller brush, the machine efficiently collects dust, dirt, leaves and debris from hard floors and external surfaces. The dual side brush configuration increases the sweeping width, improving productivity and ensuring excellent edge cleaning along walls, kerbs and obstacles.

Designed with practicality in mind, the KM 70/30 C Bp 2SB features a large waste container, robust construction and ergonomic controls for comfortable operation. Its low-noise, emission-free performance makes it particularly suitable for noise-sensitive environments, while the compact design allows easy manoeuvrability in confined areas. The machine provides a cost-effective and environmentally friendly solution for routine sweeping and facility maintenance.

Product Features

- **Battery powered walk-behind sweeper**
- Supplied with **2 side brushes** for increased cleaning width
- Powerful main roller brush for effective debris collection
- Large waste hopper for extended cleaning periods
- Low-noise and emission-free operation
- Compact and highly manoeuvrable design
- Suitable for indoor and outdoor sweeping applications

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Improves sweeping productivity compared with manual methods
- Reduces operator effort during cleaning tasks
- Provides excellent edge and corner cleaning performance
- Suitable for noise-sensitive environments
- Maintains cleaner and safer floors and walkways
- Offers cordless flexibility without power cables
- Delivers reliable and cost-effective daily maintenance cleaning

Technical Characteristics

- Professional **battery powered sweeper**
- Dual side brush sweeping system
- Main roller brush for efficient debris collection
- Large-capacity waste collection hopper
- Suitable for indoor and outdoor hard surfaces
- Low-noise operation for commercial environments
- Compact walk-behind design for easy handling

Applications

Karcher KM 70/30 C Bp 2SB is ideal for warehouses, schools, hospitals, retail centres, workshops, car parks, logistics facilities and public buildings where efficient sweeping and dust control are essential. Its battery-powered operation and dual side brush system make it particularly suitable for maintaining clean, professional environments while maximising operator productivity and reducing cleaning times.

Property	Value
Weight (kg)	33.5
Voltage	36
Performance (m2 per Hour)	3920
Battery Type	Removable lithium-ion battery
Filter Area (m²)	0.6
Working Width (mm)	480
