KGS Flexis® Diamond Floor Pads 17" - Course 400 - Red - Box of 2

Variant code: 03-D17C

KGS Flexis® Diamond Floor Pads are **premium diamond-impregnated floor pads** engineered for **deep cleaning, surface renovation and chemical-free floor maintenance**. Manufactured using advanced **Ferrzon®+ microcrystal technology**, these **17-inch Coarse 400 grit red pads** effectively remove stubborn dirt, grease and surface contamination while restoring the appearance of a wide range of hard floor surfaces.

The **red Coarse 400 pad** is primarily designed for **heavy-duty surface renovation** and is the ideal starting point in the KGS Flexis floor restoration process. It is recommended for use on rough, greasy or heavily soiled floors, preparing the surface for subsequent polishing stages. Despite its effective cleaning action, it remains a mild cleaning pad that is widely recommended by flooring manufacturers for use on coated floors, helping minimise the risk of surface damage.

Designed to clean and polish **without the need for chemicals**, KGS Flexis pads deliver cleaner, shinier floors in less time while reducing chemical consumption and maintenance costs. Suitable for use with **scrubber dryers and slow or high-speed floor machines operating between 100 and 500 rpm**, they provide exceptional durability and consistent cleaning performance.

Supplied as a **box of 2**, these professional-grade floor pads are ideal for facilities management, contract cleaning and commercial floor maintenance.

Product Features
