

Lady Mop Bucket & Wringer on Castors – Blue

Variant code: 15-990358

Lady Mop Bucket & Wringer on Castors – Professional Compact Mopping System

The **Lady Mop Bucket & Wringer on Castors** is the industry standard for high-performance cleaning in tight or restricted spaces. Engineered for durability and ease of use, this all-in-one mopping combo eliminates the need for heavy lifting and manual wringing. Whether you are managing a small office, a busy café, or a healthcare facility, this compact wheeled bucket provides a professional-grade solution that fits where larger Kentucky buckets cannot.

Built from **heavy-duty polypropylene**, the "Ladybug" style bucket features a sleek, vertical-press wringer and smooth-gliding swivel castors, making it the ultimate tool for "pick-up-and-go" cleaning tasks.

Key Features & Benefits

- **Integrated Vertical Press Wringer:** The built-in gear-action wringer provides maximum water extraction with minimal effort, ensuring floors dry faster and reducing slip hazards.
- **360° Swivel Castors:** Four non-marking 2-inch wheels offer exceptional manoeuvrability, allowing the bucket to glide across hard floors, around furniture, and through narrow aisles.
- **Built-in Dirt Sump & Grid:** Designed with a deep sump under a heavy-duty grid to trap sediment and debris at the bottom, keeping your cleaning water cleaner for longer.
- **Hygienic Colour Coding:** Available in **Blue, Red, Green, and Yellow** to support HACCP compliance and prevent cross-contamination between washrooms, kitchens, and public areas.
- **Ergonomic Handle:** Features a sturdy

metal carry handle with a comfortable plastic grip for easy transport between floors or over thresholds.

- **Compact Footprint:** With a working capacity of **9 to 15 Litres**, it is perfectly sized for small-to-medium areas without the bulk of industrial 30L trolleys.

Technical Specifications

Feature	Details
Material	High-impact Polypropylene (BPA-free)
Wringer Type	Vertical Gear-Action Press
Capacity	12L – 15L (Total) / 9L (Working)
Castors	4 x 50mm (2") Non-marking Swivel Wheels
Compatibility	Socket Mops and Kentucky Mops (up to 14oz/400g)
Dimensions	Approx. 480mm (H) x 300mm (W) x 415mm (D)

Comparison: Lady Mop Bucket vs. Standard Household Bucket

Feature	Lady Mop Bucket (Wheeled)	Standard Household Bucket
Mobility	4 Swivel Castors (No lifting)	Manual Carry Only
Wringing	Mechanical Gear Press (Dryer mop)	Manual Twist/Plastic Cone
Hygiene	Dirt Sump traps silt at the bottom	Dirt recirculates in water
Durability	Commercial-grade thick plastic	Lightweight, prone to cracking
Best For	Retail, Offices, Small Restaurants	Residential, Light spills

Frequently Asked Questions (FAQ)

1. Does the wringer come off for cleaning?

Most Lady Mop models feature an integrated or fixed wringer for stability during the press cycle. However, the smooth plastic interior makes it very

easy to rinse and disinfect after use.

2. What type of mop heads can I use?

This bucket is optimized for Socket mops and smaller Kentucky mops (up to 14oz). It is not recommended for extra-large industrial Kentucky mops, which may require a larger 25L-30L bucket.

3. Do the castors work on carpets?

While designed for hard floors (tile, vinyl, wood, laminate), the 2-inch castors can navigate low-pile commercial carpets. For thick residential carpeting, carrying the bucket using the handle is recommended.

4. How does the "Sump" work?

The internal dirt grid allows heavy soil and grit to sink to the bottom of the bucket.⁷ This prevents your mop from dipping back into the "sludge," ensuring you aren't just spreading dirt back onto the floor.
