Liquid Pro Glove - XXL - Blue

Variant code: 22-AP80B4RXXL

Liquid Pro Glove – Ultimate Waterproof Grip (Blue)

Stay dry and stay in control with the **Liquid Pro Glove Blue**, the industry standard for professionals who demand high performance in wet environments. Engineered with cutting-edge **double-coating technology**, these gloves provide an impenetrable barrier against liquids while maintaining the tactile sensitivity needed for precision work.

Whether you are handling plumbing repairs, outdoor construction, or industrial maintenance, the Liquid Pro is designed to keep your hands protected, comfortable, and productive.

Key Features & Benefits

- **Dual-Layer Latex Protection:** Features a "double-dip" design. The first layer is a smooth latex full-coating for **100% waterproof protection**, followed by a second latex foam palm dip for **superior wet and dry grip**.
- **Maximum Liquid Resistance:** Designed specifically for tasks involving water, oils, and non-corrosive liquids, ensuring your hands stay dry even when submerged.
- **Ergonomic Comfort:** The seamless 13-gauge liner reduces hand fatigue during extended wear, while the **elasticated wrist** ensures a secure, debris-free fit.
- **High-Traction Foam Palm:** The micro-capillary surface of the foam latex acts like a sponge to disperse liquids, providing an unmatched "suction-like" grip on slippery surfaces.
- **Breathable Design:** Despite being fully coated, the internal materials are engineered to manage moisture and keep skin comfortable.

Technical Specifications

Feature	Specification
Material	Premium Latex / Nylon Liner
Coating Type	Double-Dipped (Smooth + Foam)
Color	High-Visibility Blue / Black
Grip Finish	Latex Foam
Cuff Style	Elasticated Knit Wrist

Pro Tips & Usage Hints

- **Size it Right:** For the best liquid protection, ensure the elasticated wrist sits snugly against your skin. This prevents liquid "run-back" down your arm.
- **Cleaning:** To extend the life of your gloves, rinse off heavy dirt or chemicals with cool water after use and air dry away from direct heat or UV light.
- **Storage:** Avoid storing latex gloves in direct sunlight, as UV rays can degrade the natural rubber over time.

Frequently Asked Questions (FAQs)

Q: Are these gloves suitable for handling chemicals?

A: While the Liquid Pro offers excellent protection against water and many liquids, they are made of latex. Always check a chemical resistance chart if you are working with harsh solvents or acids.

Q: Do these gloves provide heat protection?

A: These are primarily designed for liquid protection and grip. While the double coating provides some thermal buffering, they are not rated as dedicated heat-resistant gloves.

Q: Can I use these for gardening and landscaping?

A: Absolutely. They are excellent for handling wet soil, thorny bushes, and power tools in damp conditions.
