

Long John Gauntlet

Variant code: 22-3413

Long John Gauntlet – Waterproof Protection for Deep-Water Tasks

When the job requires more than just hand protection, the **Long John Gauntlet** steps up to provide full-arm coverage. Engineered with a high-quality **PVC coating** on a soft **cotton liner**, this gauntlet features an **integral PVC sleeve** that extends protection all the way up the arm.

Whether you are working in deep-water maintenance, chemical processing, or industrial cleaning, these gauntlets are designed to keep the wearer **clean, dry, and fully shielded** from splashes and immersion.

Key Features & Benefits

- **Extended Reach Protection:** The integrated sleeve design is **ideal for deep-water tasks**, pond maintenance, and drain cleaning where standard gloves fall short.
- **Total Liquid Barrier:** The seamless PVC exterior provides an **impenetrable waterproof shield**, ensuring hands and arms remain dry even during full submersion.
- **Comfort-Focused Liner:** A soft, **breathable cotton interlock liner** absorbs perspiration and provides a comfortable barrier between the skin and the PVC, making long shifts much easier.
- **Superior Chemical Resistance:** PVC is naturally resistant to a wide range of oils, acids, and alkalis, making this a **heavy-duty industrial safety** essential.
- **Enhanced Grip:** The textured finish on the hand area ensures a **secure grip** on slippery or wet objects, preventing accidents in high-moisture environments.

Technical Specifications

Feature	Detail
---------	--------

Feature	Detail
Material	Premium Grade PVC
Lining	100% Cotton Interlock
Length	Extra Long (Full Arm Coverage)
Colour	Industrial Blue/Red (Standard)
Protection Type	Liquid, Chemical, and Abrasion Resistant

Pro-Tips for Industrial Use

- **The Seal Check:** Before submerging, ensure the top of the sleeve is secured or tucked appropriately to prevent water from entering through the shoulder opening.
- **Layering:** For extremely cold water tasks, wear a thin thermal glove underneath the cotton liner for added insulation without losing dexterity.
- **Drying Technique:** Never dry PVC gauntlets near high heat sources (like radiators), as this can cause the PVC to become brittle. Always air-dry them by hanging them sleeve-down.

Frequently Asked Questions (FAQs)

Q: How long are these gauntlets?

A: These are "Long John" style, meaning they typically reach the upper arm/shoulder area, providing significantly more coverage than standard 14-inch or 16-inch gauntlets.

Q: Can these be used for handling harsh chemicals?

A: PVC offers excellent resistance to many chemicals, particularly acids and bases. However, we always recommend checking the specific **EN374 chemical breakthrough timetable** for the specific substances you are handling.

Q: Are they puncture-resistant?

A: While the PVC coating provides good **abrasion and tear resistance**, they are primarily designed for liquid and chemical protection. For high-risk sharps handling, a dedicated cut-resistant liner is recommended.

Why the Long John Gauntlet is a "Must-Have"

For professionals searching for **waterproof arm protection** or **extra-long PVC gloves**, the Long John Gauntlet is the gold standard. It eliminates the gap between the glove and the sleeve, providing a **fail-safe liquid barrier** that keeps you productive in the most demanding environments. It is a top-tier choice for **environmental utility workers, fisheries, and industrial tank cleaners**.
