

Marine Ultra PVC Chem Gauntlet – XL – Blue

Variant code: 22-A881BLUXL

Stay protected in the most demanding environments with the **Marine Ultra PVC Chem Gauntlet – Blue**. Specifically engineered for the maritime, petrochemical, and industrial sectors, these gauntlets provide a formidable barrier against corrosive substances while maintaining the tactile precision required for intricate tasks.

Product Overview: Marine Ultra PVC Chem Gauntlet

The **Marine Ultra Blue PVC Gauntlet** (Model A881) is a premium, double-dipped protective glove designed for high-risk environments. Whether you are handling hazardous waste, working on an offshore rig, or managing industrial cleaning agents, this gauntlet offers a superior blend of safety and comfort.

Key Features & Benefits

- **Double-Dipped PVC Coating:** Provides an extra layer of durability and extended protection against acids, alkalis, and solvents.
- **Sandy Palm Finish:** The textured surface ensures an **enhanced grip** in wet, oily, or greasy conditions, significantly reducing the risk of accidental slips.
- **Ergonomic Design:** Features a 13-gauge seamless liner that minimises hand fatigue and maximises flexibility for long shifts.
- **Extended Coverage:** At **300mm in length** and **1.45mm thickness**, it offers comprehensive protection for both the hand and the forearm.
- **Phthalate-Free & REACH Compliant:** Environmentally conscious manufacturing that prioritises user health and safety.

Technical Specifications

Attribute	Detail
-----------	--------

Attribute	Detail
Material	Premium PVC with Cotton Seamless Liner
Colour	Marine Blue
Standards	EN ISO 374-1:2016 (Type B AJKL), EN 388 (4121X), EN ISO 374-5
Certification	CE-CAT III (High-Risk Protection)
Length	300mm
Grip Type	Sandy/Rough Finish

Frequently Asked Questions (FAQ)

Q: Are these gloves suitable for handling fuel and oils? A: Yes. The PVC construction is highly resistant to hydrocarbons and oils, making them ideal for automotive and petrochemical applications.

Q: Can I use these for protection against viruses and bacteria? A: These gauntlets conform to **EN ISO 374-5**, meaning they provide a proven barrier against micro-organisms.

Q: How do I choose the right size? A: Sizing typically ranges from Small (7) to XXL (11). Measure the circumference of your palm (excluding the thumb) to find your best fit.

Q: Are they flock-lined? A: While some PVC gloves use flocking, the Marine Ultra utilises a **seamless 13-gauge liner** for superior dexterity and moisture management.

Pro-Tips for Chemical Safety & Maintenance

- **The "Pinhole" Test:** Before each use, trap air inside the gauntlet and roll the cuff down to check for any air leaks. Even a microscopic puncture can lead to chemical exposure.
- **Proper Storage:** Store in a cool, dry place away from direct sunlight. UV rays can degrade PVC over time, making it brittle.
- **Decontamination:** Always rinse your gauntlets with water before removal to prevent transferring chemicals to your skin.
