Medium Dual Bristle Brush with V2 OVA8® Socket - 10"/260mm

Variant code: 16-MD06

Medium Dual Bristle Brush with V2 OVA8® Socket is a professional **260mm (10") water-fed cleaning brush** designed to deliver exceptional cleaning performance on windows, glass, cladding and other external surfaces. Featuring durable dual bristles and an innovative **V2 OVA8® quick-release socket**, this versatile brush provides excellent agitation while allowing rapid connection to compatible OVA8® water-fed poles.

Designed for maximum flexibility, the brush supports **up to four removable water jets**, allowing operators to configure water flow from the centre, the outer edges or both simultaneously. Compatible with both **fan jets and pencil jets**, the brush enables simultaneous rinsing and scrubbing to improve cleaning efficiency. The universal socket mounting holes also allow alternative brush sockets to be fitted where required, increasing versatility across different pole systems.

Manufactured from durable, commercial-grade materials, the Streamline Medium Dual Bristle Brush is built for everyday professional use. Its sturdy construction, quick-release connection and configurable jet system make it an ideal choice for window cleaning professionals seeking reliable performance and fast accessory changes.

Product Features

- 260mm (10") medium dual bristle water-fed brush
- V2 OVA8® quick-release connector
- Compatible with OVA8® water-fed poles
- Supports up to four removable water jets
- Compatible with both fan jets and pencil jets
- Universal socket mounting holes for alternative brush sockets
- Durable commercial-grade construction
- Strong dual bristles for effective scrubbing performance

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- **Simultaneously cleans and rinses for faster productivity**
- **Flexible jet configuration adapts to different cleaning applications**
- **Quick-release OVA8® connector speeds up pole changes**
- Dual bristles provide excellent dirt agitation while protecting surfaces
- Compatible with fan or pencil jet systems
- Universal mounting increases equipment versatility
- Robust construction withstands demanding professional use
- Ideal for commercial window and exterior cleaning

Technical Characteristics

- Product Type: Water-Fed Cleaning Brush
- Brush Width: 260mm (10")
- Bristle Type: Medium Dual Bristle
- Socket Type: V2 OVA8® Quick-Release Connector
- Jet Capacity: Up to 4 Removable Jets
- Jet Compatibility: Fan Jets or Pencil Jets
- Mounting: Universal Socket Screw Holes
- Application: Window, Glass & Exterior Surface Cleaning

Applications

The **Streamline Medium Dual Bristle Brush with V2 OVA8® Socket** is ideal for **professional window cleaners, facilities management teams, commercial cleaning contractors and exterior building maintenance professionals**. Designed for use with **OVA8® water-fed pole systems**, it provides outstanding cleaning performance on **windows, glass, frames, fascias, cladding, conservatories, solar panels and other external surfaces**, combining effective scrubbing with simultaneous rinsing for professional, streak-free results.

Property	Value
