Rubbermaid Microburst® 3000 Dispenser - Black (Requires 2x C Batteries, Not Included)

Variant code: 28-1817130

Rubbermaid Microburst® 3000 Dispenser is a **compact, programmable aerosol air freshener dispenser** designed to deliver consistent fragrance and effective odour control in commercial washrooms, offices and public spaces. Combining advanced dispensing technology with a sleek, modern design, the Microburst 3000 provides a cost-effective solution for maintaining fresh and welcoming environments while minimising maintenance requirements.

Designed to work with **Microburst® super-concentrated fragrances featuring odour neutraliser technology**, the dispenser delivers long-lasting room freshness and helps eliminate unpleasant odours rather than simply masking them. Its compact size is approximately half that of many traditional aerosol dispensers, allowing for discreet installation while maintaining high-performance fragrance delivery.

The programmable system offers flexible operating schedules, including **12 or 24-hour settings** and **5, 6 or 7-day programming options**, enabling facilities managers to tailor fragrance delivery to building occupancy and usage patterns. A proactive display system alerts users when fragrance refills or batteries need replacing, helping ensure continuous operation.

Finished in a clean **white housing**, the dispenser is powered by **2 x D-cell batteries (not included)** and is ideal for professional washroom and air care programmes.
