Microfibre Cloth - Pack of 10 - Red

Variant code: 12-605R

Microfibre Cloths are high-performance reusable cleaning cloths designed to deliver superior dirt removal, exceptional absorbency and streak-free cleaning results across commercial, industrial and domestic environments. Manufactured from a durable 80% polyester and 20% polyamide microfibre blend, these professional-grade cloths provide efficient multi-surface cleaning with reduced chemical usage.

Engineered specifically for professional cleaning contractors, janitorial teams and facilities management operations, these ultra-fine split-fibre cloths effectively trap and lift dirt, dust, grease and allergens using advanced electrostatic cleaning action. Their lint-free microfibre construction delivers streak-free polishing performance on glass, mirrors, stainless steel and high-gloss surfaces while remaining gentle on delicate finishes.

Highly absorbent and durable, these professional microfibre cloths can absorb up to seven times their own weight in liquid, making them ideal for spills, wiping and drying applications. The blue colour supports hygiene colour-coding systems to help reduce cross-contamination in commercial kitchens, washrooms, healthcare facilities and office environments. Supplied in a convenient **pack of 10 cloths**, these reusable cloths offer a cost-effective and sustainable cleaning solution.

Product Features

- **Professional microfibre cleaning cloths**
- Manufactured from 80% polyester and 20% polyamide
- Advanced split-fibre cleaning technology
- Lint-free and streak-free cleaning performance
- Highly absorbent reusable cloth construction
- Machine washable up to 90°C
- Blue colour supports hygiene colour-coding systems
