

MotorScrubber – UK 3-Pin Charger Assembly – Genuine Replacement Charger

Variant code: 16-MS1580-3

MotorScrubber UK Charger Assembly is a **genuine replacement battery charger** designed to provide safe, reliable and efficient charging for compatible **MotorScrubber cleaning machines**. Engineered to maintain optimum battery performance, this charger ensures your equipment remains powered and ready for professional cleaning operations.

Featuring a standard **UK 3-pin plug assembly**, the charger offers simple and convenient connection to mains power, making battery charging straightforward in commercial, industrial and public sector environments. Designed to work seamlessly with compatible MotorScrubber battery systems, it delivers consistent charging performance to help maximise battery life and operational reliability.

Built to professional standards, the charger is ideal as a replacement for an existing unit or as an additional charger for busy cleaning teams requiring multiple charging locations. Its durable construction ensures dependable long-term performance in demanding cleaning environments.

As a genuine MotorScrubber accessory, the UK Charger Assembly provides the compatibility and reliability required to keep your cleaning equipment operating at peak efficiency.

Product Features

- **Genuine MotorScrubber charger assembly**
- **Standard UK 3-pin plug**
- Designed for compatible MotorScrubber machines
- Provides safe and efficient battery charging
- Reliable commercial-grade construction
- Ideal as a replacement or spare charger
- Easy plug-and-charge operation

Product Benefits

- **Keeps MotorScrubber machines**

- charged and ready for use
- Supports optimum battery performance and longevity
- Provides reliable and consistent charging
- Reduces downtime during cleaning operations
- Simple connection to standard UK mains power
- Genuine compatibility for dependable operation

Technical Characteristics

- Product Type: **Battery Charger Assembly**
- Plug Type: **UK 3-Pin**
- Compatibility: **MotorScrubber Battery-Powered Machines**
- Power Source: Mains Powered
- Application: Battery Charging and Maintenance
- Genuine MotorScrubber accessory

Applications

MotorScrubber UK Charger Assembly is ideal for **cleaning contractors, healthcare facilities, schools, hospitality venues, leisure centres, retail environments and commercial buildings** using MotorScrubber battery-powered cleaning equipment. Suitable for routine charging and battery maintenance, it helps ensure machines remain operational and ready for daily professional cleaning tasks.
