MotorScrubber - JET3 - Battery Powered Backpack Scrubbing Machine with Spray

Variant code: 16-MSJET

MotorScrubber JET3 is a **battery-powered backpack scrubbing machine with an integrated solution spray system**, designed to deliver powerful cleaning performance in confined, hard-to-reach and high-risk hygiene areas. Combining a lightweight backpack battery with a high-torque rotary scrubbing head and onboard solution delivery, the JET3 provides a complete cleaning solution for professional cleaning contractors and facilities management teams.

Featuring a self-contained pump and solution spray system, the JET3 applies cleaning solution directly in front of the brush head, improving cleaning efficiency while reducing operator effort. Powered by a lightweight **3kg backpack battery**, the machine provides up to **3.5 hours of runtime**, allowing operators to clean continuously without the restrictions of power cables.

Built in the UK to exceptional quality standards, the JET3 delivers a powerful **354rpm high-torque motor** that effectively removes dirt, grime and contamination from floors and surfaces. Its fully adjustable handle and brush head angle allow comfortable operation in a variety of cleaning positions, making it ideal for washrooms, stairways, under benches, behind toilets and other confined spaces.

The fully waterproof scrubbing head further enhances versatility, enabling cleaning in wet environments and specialist applications such as pool surrounds and underwater waterline cleaning. Compact, lightweight and highly manoeuvrable, the JET3 is a professional cleaning solution designed to tackle areas beyond the reach of conventional floor cleaning equipment.

Product Features

- **Battery-powered backpack scrubbing machine**
- Integrated pump and solution spray system
- Lightweight **3kg backpack battery**

- Up to **3.5 hours runtime**
- Powerful **354rpm high-torque motor**
- Fully adjustable handle length
- Adjustable brush head angle
- Fully waterproof scrubbing head
- Built in the UK
- Designed for confined and hard-to-reach areas

Product Benefits

- **Cleans and sprays simultaneously for greater efficiency**
- **Cordless operation improves safety and manoeuvrability**
- **Up to 3.5 hours runtime supports extended cleaning sessions**
- Ideal for cleaning difficult-access areas
- Adjustable design improves user comfort and control
- Waterproof head allows specialist wet-area applications
- Lightweight backpack reduces operator fatigue

Technical Characteristics

- Model: **MotorScrubber JET3**
- Power Source: **Battery Powered**
- Battery Backpack Weight: **3kg**
- Runtime: **Up to 3.5 Hours**
- Motor Speed: **354rpm**
- Solution Delivery: **Integrated Pump & Spray System**
- Brush Head: **Fully Waterproof**
- Handle: Fully Adjustable
- Head Angle Adjustment: Yes
- Manufactured in the UK

Applications

MotorScrubber JET3 is ideal for **washrooms, healthcare facilities, leisure centres, swimming pools, schools, hospitality venues, transport hubs, commercial kitchens and public buildings**. Perfect for cleaning **behind toilets, around sanitary fittings, under benches, stairways, corners, pool surrounds, waterlines and other confined spaces**, it delivers professional scrubbing performance and enhanced hygiene standards wherever conventional cleaning machines cannot easily reach.
