MotorScrubber Wall Dock - Wall Mounted Storage Station for MotorScrubber Machines

Variant code: 16-MS1073

MotorScrubber Wall Dock is a **purpose-designed wall-mounted docking station** that provides safe, secure and organised storage for **MotorScrubber MS2000, FORCE and JET cleaning machines**. Designed to maximise storage efficiency and protect valuable cleaning equipment, this genuine MotorScrubber accessory offers a practical solution for equipment management in commercial cleaning environments.

The wall dock installs quickly and easily onto suitable wall surfaces, creating a dedicated storage location that keeps machines safely off the floor and readily accessible when required. By providing a secure docking point, it helps reduce the risk of accidental damage, improves workplace organisation and promotes better equipment care.

Its robust construction is designed to withstand the demands of professional cleaning operations, ensuring reliable support for MotorScrubber machines while helping to maintain tidy cleaning cupboards, stores and maintenance areas. The compact wall-mounted design also helps optimise available storage space, making it ideal for facilities where floor space is limited.

As a genuine MotorScrubber accessory, the Wall Dock is specifically engineered for compatibility with the **MS2000, FORCE and JET ranges**, providing a professional and convenient storage solution for cleaning teams.

Product Features

- **Wall-mounted docking and storage station**
- Designed for **MotorScrubber MS2000, FORCE and JET machines**
- Quick and easy wall installation
- Secure machine storage solution
- Space-saving design
- Durable commercial-grade construction
- Genuine MotorScrubber accessory

Product Benefits

Tel: 01626 355177
