

## MR Cut PU Palm Glove – XL – Grey

Variant code: 22-A622G7RXL

### MR Cut PU Palm Glove – Grey | High-Performance Level C Cut Protection

The **MR Cut PU Palm Glove** in sleek grey is engineered for environments where sharp edges and fine motor tasks collide. Designed with a high-performance polyethylene (HPPE) liner and a resilient polyurethane (PU) coating, these gloves offer the perfect balance of **durability, comfort, and Level C cut resistance**.

Whether you are handling glass, sharp metal components, or performing intricate assembly work, these gloves provide a "second skin" feel that keeps you protected and productive throughout the workday.

#### Key Features & Benefits

- **Superior Cut Resistance:** Rated **Cut Level C** (EN388:2016), providing robust protection against slicing hazards and sharp materials.
- **Polyurethane (PU) Palm Coating:** Offers exceptional grip in dry and slightly oily conditions while maintaining maximum breathability and flexibility.
- **Precision Handling:** The thin, lightweight liner allows for excellent **fingertip sensitivity**, making them ideal for small parts assembly and technical work.
- **Ergonomic Fit:** The seamless knitted construction reduces hand fatigue and prevents irritation during extended wear.
- **Durable & Washable:** High abrasion resistance ensures a long lifespan, providing excellent value for money.
- **Elasticated Knit Wrist:** Ensures a secure fit and prevents dust and debris from entering the glove.

## Ideal Applications

These gloves are the go-to choice for professionals across various industries:

- **Construction & Trades:** Handling steel drylining, HVAC ducting, and cabling.
- **Glass Handling:** Safe manipulation of panes and glazed units.
- **Automotive:** Assembly line work and handling sharp engine components.
- **Metal Fabrication:** Deburring, sheet metal handling, and light welding prep.
- **Warehousing:** Opening pallets and heavy-duty packaging tasks.

## Technical Specifications

Feature	Details
<b>Material</b>	HPPE (High-Performance Polyethylene)
<b>Coating</b>	Grey Polyurethane (PU)
<b>Cut Level</b>	ISO 13997 Level C / EN388:2016 (4X43C)
<b>Colour</b>	Grey Liner / Grey Coating (Hides dirt/grime)
<b>Cuff Type</b>	Elasticated Knit Wrist

## Frequently Asked Questions (FAQ)

**Q: What is the difference between Cut Level A and Cut Level C?****A:** Cut Level C (measured in Newtons) offers significantly higher protection than Level A. While Level A is for general handling, Level C is specifically designed for environments with a legitimate risk of lacerations from sharp objects like glass shards or metal offcuts.

**Q: Are these gloves touch-screen compatible?****A:** While not explicitly marketed as "touch-screen gloves," the thin PU coating often allows for basic interaction with industrial tablets and smartphones without removing the glove.

**Q: Can I wash these gloves?****A:** Yes. We recommend a cool wash (up to 40°C) with mild detergent. Air dry only; avoid tumble drying to maintain the integrity of the HPPE fibres.

## Professional Hints & Safety Tips

- **Size Matters:** A glove that is too tight will overstretch the fibres, reducing cut protection. A glove too loose reduces dexterity. Check our size guide for the perfect fit.
- **Know the Limit:** While these are Cut Level C, they are **not puncture-proof** or resistant to moving serrated blades or saws. Always perform a risk assessment for your specific task.
- **Storage:** Store in a cool, dry place away from direct sunlight. Prolonged UV exposure can degrade the high-performance fibres over time.
