Sterimax Ecohold Biodegradable Blue Nitrile Gloves - Box of 100 - X Large

Variant code: 22-995XL

Sterimax Ecohold Biodegradable Nitrile Gloves are **single-use disposable protective gloves** designed for professional environments where hygiene, durability and environmental responsibility are essential. Part of the Sterimax Ecohold range, these gloves combine reliable barrier protection with biodegradable technology, offering a more sustainable alternative to standard nitrile gloves.

Manufactured from nitrile, they provide resistance to chemicals, oils and contaminants commonly encountered in healthcare, food handling and cleaning applications. The **biodegradable formulation** supports improved breakdown in landfill conditions, helping organisations reduce environmental impact while maintaining performance. The **blue colour** supports compliance with hygiene and food safety standards, enabling clear visual identification in regulated environments.

Available in **Small, Medium, Large and XL sizes**, these gloves ensure a secure and comfortable fit for a wide range of users. Their flexible construction supports dexterity during detailed tasks, while maintaining consistent protection across different hand sizes. They integrate easily into existing PPE systems and daily hygiene routines.

Product Features

- **Biodegradable nitrile formulation** for reduced environmental impact
- **Powder-free disposable gloves**
- Available in **Small, Medium, Large and XL sizes**
- **Textured surface** for improved grip
- Strong resistance to **punctures and chemicals**
- **Blue colour** for hygiene compliance

Product Benefits

- Supports more environmentally responsible disposal practices

Tel: 01626 355177
