Numatic 38mm Anti-Static Hose

Variant code: 16-602111

Numatic 38mm Anti-Static Hose is a professional-grade vacuum hose designed to provide safe, reliable and efficient dust extraction in commercial, industrial and specialist cleaning environments. Featuring anti-static properties and a durable construction, this hose helps minimise the build-up of static electricity while maintaining excellent airflow and suction performance.

Manufactured for demanding applications, the **38mm diameter** design allows for increased airflow and efficient collection of dust, debris and larger particles. The anti-static construction helps dissipate static charges generated during vacuuming, making it particularly suitable for environments where fine dusts or static-sensitive equipment may be present. Flexible and easy to manoeuvre, the hose provides excellent operator comfort while maintaining durability for daily professional use.

Compatible with a range of Numatic vacuum cleaners and extraction systems using 38mm accessories, this hose is ideal for maintaining safe and effective cleaning operations. Its robust design helps extend service life while ensuring consistent performance across a variety of cleaning tasks.

Product Features

- **Professional anti-static vacuum hose**
- **38mm diameter** for enhanced airflow
- Anti-static construction helps dissipate static build-up
- Flexible design for improved manoeuvrability
- Durable commercial-grade construction
- Suitable for dust extraction and vacuum cleaning applications
- Compatible with selected Numatic 38mm systems

Product Benefits

- Reduces static electricity during operation
- Maintains strong airflow and suction performance

- Suitable for fine dust and specialist cleaning environments
- Improves operator comfort and ease of use
- Built for demanding commercial applications
- Provides reliable long-term performance
- Helps support safer cleaning operations

Technical Specifications

- Product Type: Anti-Static Vacuum Hose
- Diameter: 38mm
- Construction: Flexible anti-static hose
- Application: Vacuum cleaning and dust extraction
- Commercial and industrial grade design
- Compatible with selected Numatic 38mm vacuum systems
- Designed for professional cleaning environments

Applications

Numatic 38mm Anti-Static Hose is ideal for industrial facilities, workshops, manufacturing environments, warehouses, schools, healthcare facilities, cleaning contractors and facilities management teams. Perfect for vacuum cleaning and dust extraction tasks where static control, durability and reliable airflow performance are important.
