Numatic 38mm Antistatic Widetrack Floor Tool - 400mm

Variant code: 16-602112

Numatic 38mm Antistatic Widetrack Floor Tool - 400mm is a professional-grade vacuum floor nozzle designed for efficient cleaning of large floor areas while helping to minimise static build-up during operation. Featuring a wide 400mm cleaning path and anti-static construction, this genuine Numatic accessory delivers excellent dust collection performance and increased productivity in commercial, industrial and specialist cleaning environments.

The extra-wide **400mm cleaning width** allows operators to cover larger areas more quickly than standard floor tools, making it ideal for warehouses, workshops, schools, factories and other expansive floor spaces. Its anti-static design helps dissipate static electricity generated during vacuuming, reducing dust attraction and improving cleaning efficiency in sensitive environments. The robust construction ensures long-term durability, while the wide-track design maintains excellent floor contact for consistent debris removal.

Compatible with Numatic's **38mm accessory system**, the Widetrack Floor Tool provides superior airflow and suction performance for demanding cleaning applications. Built to withstand daily commercial use, it is an ideal solution for professional users seeking faster, safer and more efficient floor cleaning.

Product Features

- **Genuine Numatic antistatic floor tool**
- **Extra-wide 400mm cleaning width**
- **38mm accessory compatibility**
- Anti-static construction helps reduce static build-up
- Wide-track design for maximum floor coverage
- Durable commercial-grade construction
- Suitable for large-area floor cleaning applications

Product Benefits

Tel: 01626 355177
Email: info@aukhygiene.com

- Increases cleaning productivity with wider floor coverage
- Reduces cleaning time in large areas
- Helps minimise static attraction of dust and debris
- Maintains excellent suction and airflow performance
- Provides smooth and efficient floor cleaning
- Built for demanding commercial and industrial use
- Supports cleaner and safer working environments

Technical Specifications

- Product Type: Widetrack Floor Tool
- Brand: Numatic
- Connection Size: 38mm
- Cleaning Width: 400mm
- Construction: Anti-static commercial-grade material
- Application: Large area floor cleaning
- Compatible with Numatic 38mm vacuum systems

Applications

Numatic 38mm Antistatic Widetrack Floor Tool - 400mm is ideal for warehouses, factories, workshops, schools, retail premises, logistics centres, commercial buildings and industrial facilities. Perfect for cleaning large hard floor areas where maximum productivity, effective dust collection and anti-static performance are required.

Property	Value
