Numatic 38mm Hose - 5m

Variant code: 16-602105

Numatic 38mm Hose - 5m is a genuine-style replacement vacuum hose designed to provide extended reach, excellent airflow and reliable performance for compatible Numatic commercial vacuum cleaners. Built for demanding cleaning environments, this durable hose offers the flexibility and strength required for professional cleaning applications while helping to maximise productivity and cleaning efficiency.

With a generous **5 metre length** and a **38mm diameter**, the hose delivers excellent airflow and suction performance, making it ideal for larger cleaning areas where increased reach is essential. The flexible construction allows easy manoeuvrability around obstacles, furniture and equipment, while the robust design withstands the rigours of daily commercial and industrial use. Its larger diameter also makes it particularly effective for collecting heavier debris and maintaining strong vacuum performance over longer distances.

Designed for compatibility with a range of Numatic vacuum systems, this replacement hose provides a dependable solution for maintaining equipment performance and reducing downtime. Easy to connect and built for long service life, it is an essential accessory for professional cleaning contractors, facilities management teams and industrial users.

Product Features

- **Professional replacement vacuum hose**
- **38mm hose diameter**
- **5 metre hose length**
- Flexible design for improved manoeuvrability
- Maintains excellent airflow and suction performance
- Durable construction for commercial use
- Compatible with selected Numatic vacuum cleaners

Product Benefits

- Provides extended cleaning reach
- Reduces the need to reposition equipment
