

Numatic 38mm Stainless Steel Crevice Tool – 610mm

Variant code: 16-602926

Numatic 38mm Stainless Steel Crevice Tool is a **professional long-reach vacuum accessory** designed for cleaning **deep, narrow and hard-to-access spaces**. Constructed from **high-quality stainless steel** and measuring **610mm in length**, this heavy-duty crevice tool is ideal for industrial, commercial and workshop environments where durability and extended reach are essential.

The slim profile allows the tool to access confined areas such as behind machinery, boilers, radiators, shelving, pipework and fixed equipment, while the **38mm connection** ensures excellent airflow and powerful suction for efficient removal of dust, dirt and debris. The robust stainless steel construction offers outstanding resistance to corrosion, impact and everyday wear, making it suitable for demanding cleaning applications.

Designed as a direct-fit accessory for compatible **38mm Numatic vacuum cleaners**, the crevice tool installs quickly and securely, providing reliable performance for routine maintenance and specialist cleaning tasks. Its durable design ensures long service life while enhancing the versatility of your vacuum cleaner.

Ideal for professional cleaners and maintenance teams, the Numatic 38mm Stainless Steel Crevice Tool delivers dependable cleaning performance in areas that are difficult to reach with standard vacuum tools.

Product Features

- **38mm stainless steel crevice vacuum tool**
- **610mm long-reach design**
- Heavy-duty stainless steel construction
- Slim profile for narrow and confined spaces
- Corrosion and impact resistant
- Maintains excellent airflow and suction
- Direct fit for compatible 38mm vacuum cleaners
- Suitable for commercial and industrial cleaning

Product Benefits

- **Provides extended reach for difficult-to-access areas**
- **Efficiently removes dust and debris from confined spaces**
- **Durable stainless steel construction withstands demanding use**
- Maintains strong vacuum suction performance
- Improves cleaning around machinery, pipework and equipment
- Long service life reduces replacement costs

Technical Characteristics

- **Product Type:** Crevice Tool
- **Brand:** Numatic
- **Material:** Stainless Steel
- **Diameter:** 38mm
- **Length:** 610mm
- **Connection:** 38mm Push Fit
- **Application:** Dry Vacuum Cleaning
- **Compatibility:** Numatic and other compatible 38mm vacuum cleaners

Applications

Numatic 38mm Stainless Steel Crevice Tool is ideal for **commercial cleaning contractors, industrial facilities, warehouses, manufacturing plants, workshops, healthcare facilities, schools and facilities management teams**. Designed for cleaning **behind machinery, boilers, radiators, pipework, shelving, ventilation systems and other narrow or hard-to-reach spaces**, it delivers professional long-reach cleaning performance while providing exceptional durability for demanding environments.

Property	Value
Length (mm)	610
Material	Stainless Steel
Diameter (mm)	38
Connection Size	38mm Push Fit
