Numatic Discharge Hose - 10m

Variant code: 16-604245

Numatic Discharge Hose - 10m is a genuine accessory designed for use with compatible Numatic auto pump-out wet vacuum cleaners. Engineered to efficiently discharge collected waste water away from the machine, this durable 10-metre hose provides the flexibility and reach required for continuous wet vacuuming operations in commercial and industrial environments.

With a generous **10 metre length**, the discharge hose allows waste water to be directed to suitable drainage points without the need to frequently stop and empty the machine manually. Designed specifically for auto pump-out wet vacuums, it supports uninterrupted operation during flood recovery, floor maintenance, washdown procedures and large-scale liquid collection tasks. Its flexible construction ensures easy routing around obstacles while maintaining reliable waste water flow.

Manufactured for demanding professional use, the Numatic Discharge Hose offers dependable performance and long service life. Whether used for routine maintenance cleaning or emergency water recovery, it helps maximise productivity and minimise downtime by allowing continuous waste water removal throughout the cleaning process.

Product Features

- **Genuine Numatic discharge hose**
- **10 metre hose length**
- Designed for auto pump-out wet vacuum cleaners
- Allows continuous waste water discharge
- Flexible and durable construction
- Suitable for commercial and industrial applications
- Easy to connect and operate

Product Benefits

- Reduces the need for manual tank emptying
- Supports continuous wet vacuum operation
- Improves productivity during liquid recovery tasks
