Numatic Drive Board - 330mm

Variant code: 16-606111

Numatic Drive Board is a **professional floor pad holder** designed for use with compatible **Numatic rotary floor machines and scrubber dryers**. Engineered to securely hold floor cleaning, polishing and maintenance pads, this genuine Numatic accessory provides reliable performance across a wide range of floor care applications, helping operators achieve consistent and professional results.

Manufactured for durability and efficient pad retention, the drive board creates a secure connection between the machine and floor pad, ensuring optimal contact with the floor surface during operation. This allows cleaning pads, polishing pads and stripping pads to perform effectively while maintaining smooth machine operation and even pressure distribution.

The 330mm drive board is suitable for a variety of floor maintenance tasks, including routine cleaning, polishing, buffing and floor preparation. Its robust construction is designed to withstand frequent commercial use while maintaining dependable performance in demanding cleaning environments.

As a genuine Numatic accessory, the drive board offers seamless compatibility with appropriate Numatic floor machines, helping maintain machine efficiency and supporting high standards of floor care. Whether used for daily maintenance or specialist floor treatment applications, it provides a dependable solution for professional cleaning operations.

Product Features

- Genuine Numatic drive board
- Designed to securely hold floor maintenance pads
- Compatible with selected Numatic floor machines
- Suitable for cleaning, polishing and buffing applications
- Durable commercial-grade construction
- Provides even pad contact with floor surfaces
- Easy installation and removal
