

Numatic ERP180 – Eco Tub 8L Vacuum Cleaner inc Tool Kit – 240V

Variant code: 16-ERP180

Numatic ERP180 Eco Tub Vacuum Cleaner is an environmentally sustainable professional vacuum cleaner engineered to deliver powerful cleaning performance while reducing environmental impact. Manufactured using Numatic's innovative ReFlo Technology, the ERP180 combines professional-grade durability, energy efficiency and reliable cleaning performance, making it an ideal solution for commercial cleaning contractors, educational facilities, healthcare environments and office buildings.

Constructed from up to 75% high-quality recycled post-industrial plastic, the ERP180 helps divert valuable materials from landfill and incineration without compromising the robust build quality for which Numatic is renowned. The compact tub design provides excellent manoeuvrability and easy storage, making it particularly suitable for daily cleaning tasks in busy commercial environments.

At the heart of the ERP180 is Numatic's highly efficient 420W motor, delivering the same professional cleaning performance expected from a commercial vacuum while reducing energy consumption by up to 30% compared to previous models. This allows organisations to lower operating costs whilst supporting sustainability objectives. The machine is further enhanced with a high-visibility 10-metre power cable, helping improve safety and extend cleaning reach across large areas.

Supplied complete with a professional tool kit, the ERP180 offers versatile cleaning capability across carpets, hard floors, furniture and difficult-to-reach areas. Combining environmental responsibility with dependable performance, the ERP180 represents the next generation of sustainable professional cleaning equipment.

Product Features

- **Environmentally sustainable**

professional vacuum cleaner

- Manufactured using Numatic ReFlo Technology
- Constructed from up to 75% recycled plastic
- High-efficiency 420W vacuum motor
- Compact and manoeuvrable tub vacuum design
- High-visibility 10m power cable
- Professional cleaning tool kit included
- Commercial-grade Numatic build quality

Product Benefits

- Reduces environmental impact through recycled material construction
- Lowers energy consumption and operating costs
- Provides professional cleaning performance for daily use
- Offers excellent manoeuvrability in confined spaces
- Improves operator safety with high-visibility cable design
- Delivers long service life in demanding environments
- Supports organisational sustainability initiatives

Technical Characteristics

- **ReFlo recycled plastic construction technology**
- Manufactured from up to 75% recycled material
- High-efficiency 420W vacuum motor
- 8L collection capacity
- 10m high-visibility mains cable
- Compact tub vacuum configuration
- Professional accessory kit supplied
- 240V mains powered operation

Applications

Numatic ERP180 Eco Tub Vacuum Cleaner is ideal for contract cleaning companies, offices, schools, universities, healthcare facilities, hospitality venues, retail premises and public buildings. Its compact design, energy-efficient operation and sustainable construction make it particularly suitable for organisations seeking to reduce environmental impact whilst maintaining professional cleaning standards.

Property	Value
